The 3D food printing market is projected to grow from \$XX million in the year 2018 to \$525.6 million by 2023, at a CAGR of XX% from 2018 to 2023.

Over the last decade, the global food industry has witnessed a massive transformation, owing to the increasing demand for sustainable food manufacturing systems. Rising global population and high income growth have resulted in increased concerns regarding food security across the globe. Various food processors and technology innovators are developing numerous sustainable food production systems. As compared to the conventional food manufacturing system, 3D printing technology, though at a nascent stage, has the ability to supply food to an ever-increasing global population. With the rapid technological advancements, 3D food printing is expected to present an extensive amount of opportunities to revolutionize the global food industry.

**Food & Beverage Processing Equipment Market by Type (Processing, Pre-Processing), Application (Bakery & Confectionery, Meat & Poultry, Dairy, Alcoholic & Non-Alcoholic Beverages), Mode of Operation, End-Product Form, and Region - Global Forecast to 2023**

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/450005](http://www.giiresearch.com/ce/450005)

The food & beverage processing equipment market is estimated at USD 55.43 billion in 2018, and is projected to reach a value of USD 74.44 billion by 2023, growing at a CAGR of 6.1%. The market is primarily driven by factors such as the rise in demand for meat, poultry, dairy, bakery, and confectionery products and growth in demand for processed and convenience food. However, the rise in costs of production due to increasing energy and labor costs and growth in demand for organic and fresh food products are few factors that are expected to restrict the growth of the food & beverage processing equipment market in the long run.

"On the basis of application, meat & poultry is projected to be the fastest growing segment in the food & beverage processing equipment market during the forecast period."

Based on the application of the food & beverage processing equipment, the meat & poultry segment is projected to grow at the highest rate. The expected rise in production units in countries such as the US and a shift in the consumption patterns and preference for processed as well as frozen meat products, with rise in the number of quick-service restaurants in some developing countries of Asia such as India, Indonesia, and Thailand, are supporting the growth of the market for meat processing equipment in this region.

**Global Breakfast Cereals Market (Volume, Value) - Analysis By Type (RTE, Hot), Sales Channel (Online, Offline), Ingredient (Rice, Wheat, Corn, Others), Market Share, By Region, By Country: Forecast to 2023, 2018 Edition**

A comprehensive research report created through extensive primary research (inputs from industry experts, companies, stakeholders) and secondary research, the report aims to present the analysis of Global Breakfast Cereals Market By Volume, By Value, By Type (RTE, Hot), By Sales Channel (Online, Offline), By Ingredient (Rice, Wheat, Corn, Others), By region and by Country. The regions assessed in the report include North America, Europe, APAC and the countries include U.S., Canada, Germany, United Kingdom, Spain India, Japan and China. The report provides a competitive landscape with market share of leading players in each country analyzed.

According to Azoth Analytics research report "Global Breakfast Cereals Market (Volume, Value) - Analysis By Type (RTE, Hot), Sales Channel (Online, Offline), Ingredient (Rice, Wheat, Corn, Others), Market Share, By Region, By Country (2018 Edition): Forecast to 2023" the global breakfast cereals market is projected to display a robust growth represented by a CAGR of 3.01% during 2018 - 2023.

**Global Animal Feed Additive Market By Type (Amino Acids, Vitamins, Minerals, Enzymes & Others), By Livestock (Poultry, Swine, Cattle, Aquaculture & Others), By Region, Competition Forecast & Opportunities, 2013 - 2023**

According to "Global Animal Feed Additive Market By Type, By Livestock, By Region, Competition Forecast & Opportunities, 2013 - 2023" animal feed additive market is projected to reach \$ 14.15 billion by 2023, predominantly on account of increasing production of livestock across the globe. Moreover, rapid urbanization, increasing preference for processed food and growing consumption of poultry and pork as sources of protein are among the key factors that are expected to boost demand for animal feed additives across the globe during forecast period. As animal feed additives also provide disease prevention and improve feed utilization, demand for animal feed additives is anticipated to register healthy growth in the coming years. Some of the major players operating in the global animal feed additive market are Koninklijke DSM N.V., Evonik Industries AG, DowDuPont Inc., Bluestar Adisseo Company, BASF SE, Cargill Inc., Lonza AG, Archer Daniels Midland Company, Novozymes A/S, Chr. Hansen A/S, etc. "Global Animal Feed Additive Market By Type, By Livestock, By Region, Competition Forecast & Opportunities, 2013 - 2023" discusses the following aspects of animal feed additive in global market:

**Protein Hydrolysates Market by Type (Milk, Meat, Marine, Egg, Plant, Yeast), Application (Infant Nutrition, Clinical Nutrition, Weight Management, Feed), Process (Enzymatic, Acid & Alkaline), Source, Form, and Region - Global Forecast to 2023**

The protein hydrolysates market is projected to have a CAGR of 8.56%, to reach USD 4.13 billion by 2023, from USD 2.74 billion in 2018. The demand for protein hydrolysates is projected to be on the rise, owing to factors such as an increase in demand for nutrition-based products-which include clinical nutrition and infant formulas-animal feed, and weight management products. Increased use of premium ingredients with high protein content in nutritional food products creates significant demand for protein hydrolysates around the world. Also, increasing health awareness, leading to the consumption of functional and nutritional food among consumers is another considerable growth driving factors for the global protein hydrolysates market. However, high R&D cost and stringent government regulations have been restraining the growth of this market, worldwide.

**The Baby Food Sector in Spain, 2018**

Published by GlobalData

Pub. Date 2018/06/28

Price

USD 3275 PDF by E-mail (Single User License) ~

USD 9825 PDF by E-mail (Global License)

[www.giiresearch.com/ce/659782](http://www.giiresearch.com/ce/659782)

"The Baby Food Sector in Spain, 2018", is an analytical report by GlobalData which provides extensive and highly detailed current and future market trends in the Spanish market.

The number of births fell by 35% between 2008 and 2017, with an inevitable impact on the baby food sector. The economy also shrank, leading to falling average incomes. The number of women in full-time employment declined, giving many parents time to prepare home-made baby meals. Although the situation has improved since 2014, many families are still feeling the effects.

Milks dominate sales value, accounting for 54% in 2017. Their share has declined slightly, as wet meals increased in importance, claiming 31% of value. Baby milks and wet meals (Hero) are manufactured in Spain, but imports are also high. The country is a net exporter of baby food.

Nestle continues to dominate, followed by Hero. Two Spanish companies (Alter and Ordesa) along with Lactalis and Danone compete lower down the rankings. Retailers' own labels (Mercadona, Carrefour, Dia ) and a few start-ups have made some recent progress, but are still very small.

Global Oils & Fats industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2013-17, and forecast to 2022). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

**Synopsis**

Essential resource for top-line data and analysis covering the global oils & fats market. Includes market size and segmentation data, textual and graphical analysis of market growth trends and leading companies.

**Key Highlights**

The oils & fats market consist of the retail sale of edible oils and solid fats. The oils segment consists of cooking sprays, corn oil, olive oil, sunflower oil, vegetable oil, and other edible oils. The solid fats segment consists of compound cooking fats (CCF), ghee, lard, shortening, and other solid fats. The market is valued according to the retail selling price (RSP) and includes any applicable taxes. All currency conversions have been made using constant annual average 2017 exchange rates.

USD 9504 PDF by E-mail (Enterprise License)

[www.giiresearch.com/ce/205744](http://www.giiresearch.com/ce/205744)

The global nutraceutical market should reach \$336.1 billion by 2023 from \$230.9 billion in 2018 at a compound annual growth rate (CAGR) of 7.8%, from 2018 to 2023.

**Report Scope**

This report provides market insights into the global market for nutraceuticals, with specific focus on the U.S., Europe and India and the top ingredients in those countries. It provides an array of information including market size, expected growth rates, market drivers and restraints as well as other trends and developments in the market. This market report organizes information from diverse sources into a cohesive unit that includes a comparison of premium versus mass functional product as well as the nutraceutical value chain and the evolution of functional FBS. Regulations are also covered in the scope of this report. BCC Research analyzed key categories and regions to determine the present and future nutraceutical market status and forecasted market growth from 2017 to 2023.

Global Ice Cream industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2013-17, and forecast to 2022). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### **Synopsis**

Essential resource for top-line data and analysis covering the global ice cream market. Includes market size and segmentation data, textual and graphical analysis of market growth trends and leading companies.

### **Key Highlights**

The ice cream market comprises artisanal ice cream (both dairy and water-based), impulse ice cream (single-serve ice cream tubs, packaged cones ice cream sandwiches, and chocolate-coated ice creams) and take-home ice cream (multiple-serving ice cream tubs and ice-cream cakes). The market is valued according to retail selling price (RSP) and includes any applicable taxes. All currency conversions have been made using constant annual average 2017 exchange rates.

## **The Baby Food Sector in Turkey, 2018**

Published by GlobalData

Pub. Date 2018/06/25

Price

USD 3275 PDF by E-mail (Single User License) ~

USD 9825 PDF by E-mail (Global License)

[www.giiresearch.com/ce/659783](http://www.giiresearch.com/ce/659783)

In 2016 the number of births began to fall, but the Turkish baby food market has performed strongly over the past six years as a whole, stimulated by a generally buoyant economy and strong marketing by manufacturers. The last two years have seen a slowdown in volume growth as a result of a less positive economy, but high inflation coupled with currency depreciation has forced prices and value sales up. Several manufacturers produce baby food locally, notably Hero, as well as a number of Turkish manufacturers of liquid milks, baby cereals, and finger foods. Danone dominates, claiming almost two-thirds of retail sales in 2017, and leads in all categories except finger foods. Its nearest rivals are Hero and Hipp. Baby food is widely available in supermarkets and hypermarkets. Food outlets account for almost 61% of value sales, with pharmacies/drugstores relegated to 38% in 2017. A large variety of products are available online, but e-commerce sales remain very low. As a result of a worsening economy and political uncertainty, the value of the Turkish lira against major currencies has dropped, making imported products appreciably more expensive. However, a growing middle class is able to afford baby foods, and demand among this group is growing. GlobalData expects that sales of baby food will increase, with the strongest growth coming from the underdeveloped wet meals category, and growing-up milks.

[www.giiresearch.com/ce/554885](http://www.giiresearch.com/ce/554885)

Mezcal is a distilled alcoholic spirit manufactured from the agave plant, which is native to Mexico. It has a distinctive and smoky flavour. There are 30 varieties of agave plant from which mezcal can be processed and manufactured.

Technavio's analysts forecast the Global Mezcal Market to grow at a CAGR of 21.99% during the period 2018-2022.

Covered in this report

The report covers the present scenario and the growth prospects of the global mezcal market. To calculate the market size, the report considers the revenue generated from the sales of joven, reposado, and anejo.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

Technavio's report, *Global Mezcal Market 2018-2022*, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

**Taste Modulators Market by Type (Sweet Modulators, Salt Modulators, and Fat Modulators), Application (Confectionery Products, Bakery Products, Dairy Products, Snacks & Savory Products, and Meat Products), and Region - Global Forecast to 2023**

Published by MarketsandMarkets

Pub. Date 2018/06/22

Price

USD 5650 PDF by E-mail (Single User License) ~

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/657068](http://www.giiresearch.com/ce/657068)

The global taste modulators market is estimated at USD 1,084.2 million in 2018 and is projected to reach USD 1,758.7 million by 2023, at a CAGR of 10.2% during the forecast period. One of the primary factors driving the market is the increased demand for reduced-calorie products with the original taste of sugar and growing awareness among consumers about the ill-effects of excessive salt intake. The major restraining factors for the taste modulators market include stringent regulations and international standards for sweet- and salt-reducing ingredients.

Globally, taste modulators are used to restore the taste of the finished product where the reduction of calories, salt, and fat is required. They are added to sugar substitutes to mask the aftertaste and off flavor and to -reducing agents to reduce the sodium content and maintain or enhance the salinity perception.

**Global Packaged Coconut Milk Market 2018-2022**

[www.giiresearch.com/ce/657652](http://www.giiresearch.com/ce/657652)

Coconut milk is a sweet, milky white liquid that is obtained from the grated meat of mature coconut. The rich taste and color of coconut milk can be attributed to the high oil and sugar content in it. Coconut milk is known by different names in different countries. In Malaysia and Indonesia, coconut milk is called santan while it is known as gata in the Philippines.

Technavio's analysts forecast the global packaged coconut milk market to grow at a CAGR of 8.16% during the period 2018-2022.

Covered in this report

The report covers the present scenario and the growth prospects of the global packaged coconut milk market for 2018-2022. To calculate the market size, the report presents a detailed picture of the market by way of study, synthesis, and summation of data from multiple sources.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

**Global Airline A-la-carte Services Market 2018-2022**

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/655478](http://www.giiresearch.com/ce/655478)

The meat testing market is estimated at USD 7.94 billion in 2018 and is projected to reach USD 11.48 billion by 2023. It is projected to grow at a CAGR of 7.7% during the study period. The market is primarily driven by trends such as growth in consumer awareness regarding food safety and diseases caused by consuming contaminated meat products. Another growth factor is the stringent regulations made by various government bodies, to be followed by meat and meat product producers.

Factors such as the unorganized supply chain and distribution channel in the meat processing factor restrain the growth of the meat & seafood testing market to some extent.

*The Global Market for Tuna Omega-3 Ingredients and Algae Omega-3 Ingredients are expected to register CAGRs of 4.1% and 11.6% respectively, during the forecast period of 2018-2023. The scope of the market studied covers tuna and algae omega-3 market. The global tuna oil omega-3 ingredient market has been segmented into refined and crude tuna omega-3 oil. Both the markets have been further segmented based on application type and geography.*

*Due to depleting ocean fish, as a source for omega-3, fish is not sustainable for the future. This is a major challenge for omega-3 manufacturers. Algae, being the sustainable source of omega-3 fatty acid, has triggered a market demand. However, high downstream processing of algae omega-3 is affecting the market's growth. The algae omega-3 ingredient market includes DHA and EPA, which are essential fatty acids with more focused study on algal EPA.*

*DSM and Evonik have established a joint venture for omega-3 fatty acids, from sustainable natural marine algae source for animal nutrition. The initial product application is aimed at salmon aquaculture and pet food.*

[www.giiresearch.com/ce/653498](http://www.giiresearch.com/ce/653498)

Global Gummy Vitamins Market is estimated to reach \$4.5 Billion by 2025; growing at a CAGR of 5.3% from 2017 to 2025. Gummy vitamins are the form of candies that are enriched with vitamins. When compared with regular pills and capsules, supplements in the form of gummies can be more convenient and pleasing. The natural & organic gummy vitamins are significant supplements to get in a selection of vitamins & minerals in an easily consumable and delicious way. Presently, customers' preferences have changed pertaining to vitamins, minerals & supplement segment. These vitamins have not just gained popularity among children, at whom the product was pitched initially as an appealing alternative to bitter pills, but also among adults who are health conscious and want to better their life expectancy.

The primary factors that drive the growth of global gummy vitamins market include rising consumer demand for gummy vitamins due to diversity in taste and shape, growing awareness promotions concerning preventive care, and surging occurrences of undernourished and malnutrition children in underdeveloped economies. In addition, arrival of innovative gummy vitamins products based on organic formulations by prominent players is also supporting the growth of the market.

## **Humectants Market - Global Scenario, Market Size, Outlook, Trend and Forecast, 2016 - 2025**

Published by Variant Market Research LLP

Pub. Date 2018/06/16

Price

USD 3195 Data Pack ~

USD 7695 PDF by E-mail (Global License)

[www.giiresearch.com/ce/653501](http://www.giiresearch.com/ce/653501)

Global Humectants Market is estimated to reach \$33.5 billion by 2025; growing at a CAGR of 7.1% from 2017 to 2025. Humectant, a hygroscopic substance which is used to attract and keep the moisture by absorption. It comprises many hydrophilic groups, like hydroxyl group, ester, and amines & carboxyl groups. This ingredient with moisture retention property find usage in various products like cosmetics, food, medicines as well as pesticides, among others. Humectants are also used as an element of antistatic coatings for plastics. Humectant is common ingredient in many cosmetic & personal care products that are used for moisturization such as lip balms, hair conditioners, face or body cleansers, body lotions, as well as eye creams. With widespread usage for various applications, it is expected to boost the growth of the humectants market over the forecasted period.

High demand from numerous end-use industries, mounting health concerns associated to sugar intake, increasing consumption of bakery & confectionery products, growing consumer demand about low-calorie as well as healthy food & beverage products, growing biodiesel industry are the factors driving the growth of the humectants market. However, strict regulations & international quality standards for humectants may hinder the growth of the market. Moreover, high demand for natural ingredients owing to increasing consumer awareness might provide with several growth opportunities in the forecasted year.

**Calcium Propionate Market by Application (Food (Bakery Products, Dairy & Frozen Desserts, Meat, Fish & Seafood Products), Feed), Form (Dry and Liquid), and Region (North America, Europe, Asia Pacific and RoW) - Global Forecast to 2023**

Published by MarketsandMarkets

Pub. Date 2018/06/14

Price

USD 5650 PDF by E-mail (Single User License) ~

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/290411](http://www.giiresearch.com/ce/290411)

The market for calcium propionate is estimated at USD 277.1 million in 2018 and is projected to reach USD 363.3 million by 2023, at a CAGR of 5.6%. The growth of the calcium propionate market is driven by factors such as an increase in demand for clean-label food products with extended shelf life and the cost-effectiveness of calcium propionate as compared to other preservatives. Stringent legislation and regulations with respect to food safety and shelf life have made it difficult for food and feed processing industries to getting the right formulation of ingredients along with preservatives without affecting the product quality, which acts as a major restraint for the calcium propionate market.

"The demand for dry calcium propionate is exhibiting steady growth."

On the basis of form, the dry segment is projected to exhibit a higher CAGR from 2018 to 2023. The dry segment led the market for calcium propionate. The growth of dry calcium propionate is attributed to factors such as ease of mixing and better dispersion throughout the food matrix; additionally, dry calcium propionate does not affect the leavening action of baking powder in bakery products.

**Alcoholic Drinks in Taiwan**

Pub. Date 2018/06/14

Price

USD 3195 Data Pack ~

USD 7695 PDF by E-mail (Global License)

[www.giiresearch.com/ce/653496](http://www.giiresearch.com/ce/653496)

Global Biological Seed Treatment Market is estimated to reach \$1,789 million by 2025; growing at a CAGR of 11.2% from 2017 to 2025. Biological treatment of seeds like coating seeds by foliar sprays is used for in the protection of seed from various external factors, namely plant diseases, pest infestation, and harsh weather. Innovative farming technologies have led to the usage of biologicals for treating seeds & crop grains in various methods. The increasing demand for the organic & environment friendly products, growing population around the globe, as well as supporting government policies towards microbial products are the factors which boost the growth of the global biological seed treatment market over the coming years.

Major factors driving the global biological seed treatment market are high demand for sustainable agriculture around the world, insurance to seed investments, growing global population, and low risk of exceeding pesticide MRLs. However, high cost of biological seed treatment may hamper the market growth. Furthermore, advent of advanced combination products would unfold with numerous growth opportunities in the forecasted year.

## **Global Animal Feed PhytoGenics Market, Forecast to 2021**

Published by Frost & Sullivan

Pub. Date 2018/06/14

Price

USD 4950 Web Access (Regional License)

[www.giiresearch.com/ce/658263](http://www.giiresearch.com/ce/658263)

Growing concerns worldwide over Antibiotic Growth Promoters (AGPs) in animal nutrition has resulted in efforts to use alternative ingredients that can effectively replace AGPs; phytoGenics being one such alternative. PhytoGenics are a new and exciting group of feed additives, comprising a wide range of substances that are classified according to botanical origin, processing, and composition. Growth of the phytoGenics industry is facilitated by the rising number of countries outside of the European Union restricting or banning the use of AGPs in animal feed (e.g., China, Brazil, the US) in response to rising consumer concerns over their safety. Additionally, growth of the phytoGenics industry, which currently stands at \$351.9 million globally, is aided by a growing demographic of consumers who favor the use of natural, organic and sustainable feed additives. However, the lack of standardization in the industry and the availability of phytoGenics via more traditional routes of supply hinder the growth of the industry. As a result, individual manufacturers offer their own version of processed herbals as phytoGenic feed additives. This restraint is expected to have a high impact over the course of the forecast period.

*The global alcoholic spirits market is expected to expand at a CAGR of 3.36% between 2018 and 2026. Rapid urbanization, high disposable income and the changing lifestyle and consumption habits of consumers are the dominant drivers of the global spirits market.*

**MARKET INSIGHTS**

*The global alcoholic spirits market is segmented on the basis of product type and distribution. The product type segment is further divided into rum, brandy & cognac, tequila, whiskey, white spirits, liqueurs and other spirits. The distribution channel is classified into liquor specialist store, supermarket & hypermarket, online retailing, duty-free stores and other distribution channels.*

**REGIONAL INSIGHTS**

*The global alcoholic spirits market in the Asia-Pacific is anticipated to hold a massive share by 2026. Increased awareness about spirits, strong on-premise channel growth, and increasing disposable income are the major factors driving the growth of the spirits market. Overall, China India, France and UK are anticipated to be the developing markets for alcoholic spirits. The mentioned countries are expected to witness a rise in spirits consumer base and increased production of spirits with rich flavour and aroma, compared to other geographic regions.*

Salt is a significant source of sodium in the diet of consumers worldwide and is widely used as an essential condiment in processed and packaged foods. As consumers become increasingly aware of the ill-effects of high sodium intake, they are gravitating toward reduced salt packaged food products. Packaged products labeled "low salt" or "low sodium" contain no more than 120mg sodium per 100 grams.

Technavio's analysts forecast the global reduced salt packaged food market to grow at a CAGR of 6.07% during the period 2018-2022.

Covered in this report

The report covers the present scenario and the growth prospects of the global reduced salt packaged food market for 2018-2022. To calculate the market size, the report considers the revenue generated from the sales of products such as reduced salt packaged snacks, reduced salt packaged meat, and other reduced salt packaged foods.

The market is divided into the following segments based on geography:

- Americas

**Feed Phytogenics Market by Type (Essential Oils, Herbs & Spices, and Oleoresins), Livestock (Swine, Ruminants, Aquatic Animals, and Poultry), Function (Performance Enhancers and Palatability Enhancers), and Region - Global Forecast to 2023**

Published by MarketsandMarkets

Pub. Date 2018/06/05

Price

USD 5650 PDF by E-mail (Single User License) ~

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/359797](http://www.giiresearch.com/ce/359797)

The feed phytogenics market is estimated at USD 631.4 million in 2018 and is projected to grow at a CAGR of 8.8%, to reach USD 962.5 million by 2023. Feed phytogenics play a crucial role as natural growth promoters in livestock. They have evolved as key feed additives; they increase feed intake, improve gut function, prevent diarrhea, and have anti-microbial and anti-oxidative effects on livestock. The major drivers of this industry are increasing animal husbandry, implementation of new technology such as encapsulation in feed phytogenics, and increasing focus on untapped markets such as Brazil, Thailand, Vietnam, China, and India. However, the high cost of these natural feed additives and complex composition of phytogenic feed additives are some of the factors restraining the growth of the feed phytogenics market.

"Demand for palatability enhancing feed phytogenics is projected to witness high growth during the forecast period."

On the basis of function, the palatability enhancers segment is projected to grow at the highest CAGR from 2018 to 2023. The use of phytogenics as palatability enhancers is gaining popularity with the increasing need to increase the productivity of animals due to the increasing demand for animal-based products. These products increase the feed intake in the animals, especially in the younger animals, thereby promoting the growth of the animals.

**Global Automatic Tea Bag Packaging Equipment Market - Segmented by Packaging Raw Material Type (Paper, Nylon, Silk), Packaging Bag Shape Type (Round, Pyramid), and Region - Growth, Trends and Forecast (2018 - 2023)**

Published by Mordor Intelligence LLP

Pub. Date 2018/06/04

Price

USD 4250 PDF by E-mail (Single User License) ~

USD 8750 PDF by E-mail (Corporate License)

[www.giiresearch.com/ce/649723](http://www.giiresearch.com/ce/649723)

Automatic Tea Bag Packaging Equipment Market is expected to grow at a CAGR of over 5% during the forecast period (2018 - 2023). The scope of the report is limited to packaging raw material type including nylon, paper, and silk. The regions considered in the scope of the report include North America, Europe, Asia Pacific, Latin America, and Middle East and Africa. The study also emphasizes the increasing awareness regarding the health benefits associated with the consumption of tea which, in turn, is aiding the growth of the automated tea bag packaging equipment market.

In the tea bag packaging industry, the demand for varieties of black, herbal, green, and fruit infusions is getting stronger day-by-day, and the competition is quite fierce as well. The packaging not only preserves and protects the product within the tea bag but also communicates a brand's message and ultimately contributes to the sales process. Sustainability is also one of the primary concerns in the tea bag packaging industry. As a result, packaging equipment manufacturers are increasingly adopting automation in their production line and adhering to Sustainable Trade Initiatives throughout the globe.

Oatmeal is widely consumed as a breakfast cereal, which is commonly enjoyed with fruits, nuts, and milk, due to its high dietary fiber and protein content, which helps lower cholesterol as well as provide energy for metabolism. Also, it is easy to cook, which makes it an ideal breakfast for people who are looking for a healthier lifestyle. Further, different manufactures also make this nutrient available in the form of cakes, cookies, energy bars, and desserts, for the consumers looking out for ready-to-eat oatmeal options.

Increase in preference for healthy meals and changes in food habits majorly drives the oatmeal market. Furthermore, demand for convenience food and high nutrition content of oatmeal fuels the growth of the oatmeal market. However, availability of substitute products such as quinoa, buckwheat, brown rice, and cornflakes restrain the growth of the oatmeal market. Development of different flavored oatmeal and the use of oatmeal in cosmetic industry makes way for market growth.

The oatmeal market is segmented on the basis of type, distribution channel, and geography. By type, the market is divided into oat groats, steel cut oats, Scottish oats, rolled oats, instant oats, and others. While with distribution channel the market is divided into supermarkets, hypermarkets, food specialty stores, convenience stores, and others. By region, the market is analyzed across North America, Europe, Asia-Pacific, and LAMEA.

## **Meat Substitute Market by Product Type, Source, Category - Global Opportunity Analysis and Industry Forecast, 2018-2025**

Published by Allied Market Research

Pub. Date 2018/06/01

Price

USD 3840 PDF by E-mail (Data Pack) ~

USD 8995 PDF by E-mail (Enterprise User License)

[www.giiresearch.com/ce/354610](http://www.giiresearch.com/ce/354610)

The global meat substitute market size was valued at \$7.5 billion by 2025, registering a CAGR of 7.7% during the forecast period (2018-2025). Meat is an excellent source of protein but contains high level of cholesterol and saturated fats. Individuals who consume it on a regular basis are more prone to develop health problems such as obesity and atherosclerosis.

Meat substitutes are products that resemble actual meat in terms of taste, flavor, and appearance, but are healthier as compared to meat. Such products are increasingly being used as substitutes for regular meat and meat products. They are primarily composed of ingredients such as soy, wheat, and others. Tofu is amongst the most popular meat substitute and is widely used as an alternative for pork, chicken, beef, and other meats. Europe and North America are amongst the biggest markets of meat substitutes; however Asia-Pacific is the fastest growing market.

**Bleaching Agents Market by Type (Azodicarbonamide, Hydrogen Peroxide, Ascorbic Acid, Acetone Peroxide, and Chlorine Dioxide), Form (Powder and Liquid), Application (Bakery Products, Flour, and Cheese), and Region - Global Forecast to 2023**

Published by MarketsandMarkets

Pub. Date 2018/06/01

Price

USD 5650 PDF by E-mail (Single User License) ~

USD 10000 PDF by E-mail (Global License)

[www.giiresearch.com/ce/648565](http://www.giiresearch.com/ce/648565)

The bleaching agents market is estimated at USD 728.6 million in 2018 and is projected to grow at a CAGR of 5.5%, to reach USD 953.8 million by 2023. The market is driven by factors such as the increase in consumption of bread & other bread-related products. However, the ban on certain flour bleaching agents in some countries is a major restricting factor for the bleaching agents market as bleaching agents such as potassium bromate and potassium iodate have shown an adverse impact on human health.

"The chlorine dioxide segment is projected to grow at the highest CAGR during the forecast period."

Chlorine dioxide is one of the most effective bleaching agents, which provides an instant bleaching effect to bakery products, flour, dough, and processed meat products. It also acts as a specific microbiological controller in the food & beverage industry, to wash fruits & vegetables, for brewing & bottling, for fish & meat processing, and in dairy products.
