Global Hemp Milk Market Forecast 2019-2027

Published by Inkwood Research
Price
USD 2500 PDF (Single User License) ~
USD 4500 PDF (Enterprisewide License)

The global hemp milk market is estimated to record a CAGR of 14.28% from 2019 to 2027. The global market amounted for a value of $XX million in 2018 and is expected to generate a value of $641.27 million by 2027 in terms of revenue. The rising vegan population worldwide accompanied by other factors drive the growth of hemp milk market.

MARKET INSIGHTS

Globally, the market for hemp milk comprises of segments based on category, distribution channel, product, and flavor. The distribution of hemp milk takes place through both online and offline channels. Also, both non-organic and organic products are covered in the report. In terms of revenue, the organic segment dominates the global hemp milk market owing to the rising demand for pesticide-free products.

REGIONAL INSIGHTS

Geographically, the global hemp milk market comprises of several regions such as Europe, Asia Pacific, North America, along with Rest of World segment. North America dominates the market and captured a large market share in terms of revenue in 2018. The factors like government policies, increasing public awareness, along with rising demand for hemp-based products, contribute to the growth of hemp milk market in this region.
Global Beverage Stabilizer Market Forecast 2019-2027

According to Inkwood Research, the beverage stabilizers market on a global scale will flourish with an estimated CAGR of 3.91% in terms of volume and 6.16% in terms of revenue from 2019 to 2027. By the end of 2027, the market is anticipated to reach sales of XX million Kgs and $23.58 million in terms of revenue. The flourishing food & beverage industry, along with the rising adoption of functional beverages upsurge the demand for beverage stabilizers, in turn, fueling the market growth.

MARKET INSIGHTS

The market for beverage stabilizers consists of various segments such as product type and beverages type. The stabilizers are utilized in several beverages like soft drinks, alcoholic beverages, fruit drinks, dairy beverages, and others. Further, Xanthan gum product type leads the global beverage stabilizers market. Xanthan gum is used as a food thickener in several food products. Also, by keeping ingredients suspended in the solution, stabilizers assist in the prevention of degeneration and sedimentation in beverages.

REGIONAL INSIGHTS

Europe, North America, Asia Pacific, and Rest of World are the regional segment considered in the global beverage stabilizers market. The Asia Pacific region forms the largest market for beverage stabilizers owing to the presence of emerging economies in the region. Further, the factors like booming food & beverage industry, along with a large scale availability of raw materials, are attributing to the growth of the beverage stabilizers market in this region.

Farro Market by Product and Geography - Global Forecast and Analysis 2019-2023

Technavio’s farro market analysis considers sales from both conventional farro product and organic farro product. Our analysis also considers the sales of farro in APAC, Europe, North America, South America, and MEA. In 2018, the conventional farro segment had significant market share, and this trend is expected to continue over the forecast period. Factors such as increasing use of conventional farro as an essential ingredient in food and beverages will play a significant role in the conventional farro segment to maintain its market position. Also, our global farro market report looks at factors such as ability to give good yields in mountainous regions, increased use of farro as an ingredient in muesli, and growth in organized retailing globally. However, availability of substitutes, mismanagement in the use of pesticides on crops, and post-harvest losses of cereal grain may hamper the growth of the farro industry over the forecast period.

Dairy desserts are ready-to-eat products that are made from whole or skimmed milk. Technavio's dairy desserts market analysis considers sales from the yogurt, cream, and other segments. Our analysis also considers the provision of dairy desserts in APAC, Europe, MEA, North America, and South America. In 2018, the yogurt segment held the highest market share, which is expected to remain prevalent over the forecast period. Factors such as rising product launches, increasing acquisitions, and high nutritional value of yogurt will help the segment in maintaining its leading market position. Also, our global dairy desserts report has observed market growth factors such as the increasing number of product launches, health benefits offered by dairy products, and increasing number of dairy development programs. However, challenges such as increasing number of product recall, growing demand for dairy-free desserts, and rising inclination to vegan diet may hamper the growth of the dairy desserts industry over the forecast period.

**Global Food Waste Management Market**

Published by BCC Research

USD 5500 PDF by E-mail (Single User License) ~
USD 9504 PDF by E-mail (Enterprise License)

The global market for food waste management reached $31.3 billion in 2019 and should reach $43.1 billion by 2024, at a compound annual growth rate (CAGR) of 6.6% for the period of 2019-2024.

Animal feed market reached $14.5 billion in 2019 and should reach $20.0 billion by 2024 at a CAGR of 6.6% through 2024.

Biofuel market reached $7.2 billion in 2019 and should reach nearly 10.0 billion by 2024 at a CAGR of 6.8% through 2024.

Report Scope:

The scope of this report is broad and covers global markets of food waste management processes used globally in various industries. The market is broken down by process type, waste type, methods, application, industry, and by region. Revenue forecasts from 2019 to 2024 are presented for each process type, waste type, method, application, industry and regional market.

The report also includes a discussion on the major players in each of the regional markets for food waste management. It explains the major market drivers of the global market of food waste management, the current trends within the industry and the regional dynamics of the food waste management market. The report concludes with a particular focus on the vendor landscape. It includes detailed profiles of the major vendors in the food waste management industry globally.
Global Spirits Packaging Market Size study, by Type (Organics, Inorganics), by Application (Consumer Product, Food & Beverage, Plastic Industry, Mining & Construction, Oil & Gas Industry, Construction Materials) and Regional Forecasts 2019-2026

Global Spirits packaging Market valued approximately USD XX billion in 2017 is anticipated to grow with a healthy growth rate of more than XX% over the forecast period 2018-2025. The major driving factor of global spirits packaging market are growth in disposable income and increasing demand for safe and innovative packaging. The demand for premium spirits packaging is growing as alcohol is increasingly being consumed as a status symbol and consumers are ready to pay more for high quality products. The major restraining factor of global spirits packaging market are stringent government regulations and the ban on alcohol advertising. Spirits can be defined as distilled alcoholic beverages, which is majorly manufactured through the distillation process. Spirits packaging plays a significant role in driving spirits purchases as the packaging assists in building brand equity and protects the products from outside elements. There are various benefit of spirits packaging such as with their large, flat structure and pouches provide a complete-package marketing opportunity that allows you to billboard your brand, eliminating both the possibility of cork contamination and the threat of oxidation & revolutionary smart nozzle keeps beverages fresher for up to 1 month after opening and innovative and highly marketable packaging is about more than being cool and different. It’s about the opportunity for exponential sales growth, access to new markets.

Global Protein Ingredients Market Size study, by source (Animal Source, Plant Source), Form (Dry, Liquid), Application (Food & Beverages, Cosmetics & personal Care Products, Feed, Pharmaceuticals) and Regional Forecasts 2019-2026

Global Protein Ingredients Market is valued approximately USD 49.8 billion in 2018 and is anticipated to grow with a healthy growth rate of more than 6.00% over the forecast period 2019-2026. Increasing health consciousness and rising fitness trend among people are generating the demand for high protein diet. Protein ingredients drive widespread market adoption for high nutritional value & functional advantages of food & beverages industry. Further, favorable government regulations across the globe for consumption of both plant and animal-based protein products are fueling growth in the market.

The regional analysis of global Protein Ingredients market is considered for the key regions such as Europe, Asia Pacific, North America, Latin America and Rest of the World. European market is the significant region across the world. The high-protein trend food & beverages and personal care & cosmetics is gaining a foothold in Germany. Whereas, North America is also anticipated to exhibit highest growth rate / CAGR over the forecast period 2019-2026.
Many consumers are hesitant to place much trust in the food supply. Many fear foodborne illness outbreaks and chemical contaminants and further believe that standards for animal welfare are not upheld in agriculture. Distrust of “industrial food” has led some consumers to seek out new avenues for food, including local farmers’ markets and independent shops that source locally grown produce and products from locally raised animals. However, these consumers also shop in a number of bigger stores such as supermarkets, mass merchandisers, and wholesale clubs and expect to find products that promise something different than conventionally produced food.

Producing foods that are simple and wholesome is what clean label consumers want, providing nostalgia to a different time when people were more closely involved in the methods of production. Organic consumers also tend to want these things, and they want assurances that the food they eat is produced under more stringent guidelines and is healthier than conventionally grown food.

As per Inkwood Research, the global dietary supplement market will flourish with an estimated CAGR of 6.08% between 2019 and 2027. In terms of revenue, the market is expected to generate a value of $2389.71 million by 2027. The rising demand for dietary supplements across the health and wellness industry is one of the major factors contributing to the market growth on a global scale.

**MARKET INSIGHTS**

Ingredient, end-user, products, and applications are the segments included in the global dietary supplement market. The market has a wide range of end-users such as pregnant women, children, adults, infants, and old-age population. Further, the increasing health awareness among people surges demand for dietary supplements, in turn, boosting the market growth.

**REGIONAL INSIGHTS**

On the basis of geography, the global dietary supplement market is classified into regions such as Asia Pacific, North America, Europe, and Rest of World, that includes other regions. In terms of revenue, North America region captures a significant market share in the global dietary supplement market. The presence of large companies that are offering dietary supplements in the region attributes to the market growth of dietary supplements.
Global Essential Oils Market Forecast 2019-2027

The essential oils are extracted from plants using the distillation, and its applications are found in perfumes, soaps, cosmetics, etc. The global essential oils market is estimated to grow at a CAGR of 9.18% and generate a revenue of $4487.31 million by 2027. The rising demand for natural products, shifting preferences towards natural personal care, rising demands for flavors and fragrances are the factors that stimulate the growth of essential oils market.

MARKET INSIGHTS

The essential oils are utilized across many end-user industries. The global personal care products sector is estimated to witness substantial growth during the forecast period. The rising disposable consumer income, increasing working women’s population, adoption of natural products due to awareness about female hygiene and health, choice of natural products over products with chemical or synthetic content, are the factors estimated to contribute to the growth of global essential oils market. The expensive products, the limited access to raw materials, and the lack of awareness, restrict the growth of the market. The favorable government regulations can provide ample opportunities for the growth of the essential oils market, along with its adoption in the agrochemical sector.

Global Sparkling Drinks Market - 2019-2026

Sparkling drinks are carbonated beverages produced by dissolving carbon dioxide under pressure in plain water. Consumption of sparkling water provides several benefits including relieved constipation & indigestion, improved bone & heart health, weight loss, and hydration. United States, one of the major country for sparkling water has seen significant increase in sales of sparkling water through restaurants. In 2018, Americans alone spent approximately USD 1.68 billion on sparkling water through restaurants.

The global sparkling drinks market valued USD XX million in 2018 and it is expected to grow at a CAGR of XX% to reach USD XX million by 2026.

Market Dynamics:

Growing health related concerns through consumption of sugar-added drinks led to shift in consumer preference towards consumption of healthy drinks, thus driving the demand for sparkling drinks. Sparkling evolved as an essential alternative to sugar-added drinks owing to its refreshing nature and health benefits. According to recent consumer reports, more than 70% of adults across the globe are preferring to reduce their sugar intake by replacing sugary drinks with sugar-free sparkling water. Macro factors such as rising young population and growing disposable income also are contributing to the growth of global sparkling drinks market. American consumption of sparkling water increased by 42% between 2011 and 2016. The drinking habits of millennial population made them the promising market booster in developing nations.
**Global Palm Oil & Palm Oil Derivatives Market - 2019-2026**

Palm oil is an edible vegetable oil high in saturated fats and free from trans fats. Palm oil is used in around 50% of food products available in the market. Palm oil derivatives also known as fractions are used in production of prepackaged food, cosmetics, cleaning products, hair care, soaps and other personal care products. Palm oil is also used in manufacturing of bio fuels and exhibiting as a green fuel option for motor vehicles, shipping and Aircraft fuel. Palm kernel cake, a byproduct of palm kernel oil is used as a feed in livestock.

The global palm oil & palm oil derivatives market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

**Market Dynamics:**

Cost-effectiveness and edible nature of palm oil made it an effective ingredient in production of packaged food products and healthcare products. The widening application spectrum of palm oil in food, cosmetics and personal care products are resulting in significant growth of global palm oil & palm oil derivatives market. Growing demand for food and changing food habits of people increased the need for nutrient-rich food products to meet the nutritional requirements of consumers. Focus is laid on utilization of healthy ingredients and efficient food processing technologies. Palm oil is considered as the healthiest cooking oil over all other vegetable oils owing to the nutrient and healthy fat content.

---

**Global Soy Lecithin Market - 2019-2026**

Lecithin sourced from soy has long been into use as a food additive. Wide array of food products including condiments, chocolates, and dressings use soy lecithin as emulsifier, lubricant, stabilizer, wetting and dispersing agent. Soy lecithin is also rich in choline, a vitamin-like essential nutrient that reduce the levels of bad cholesterol, thus making it dietary supplement of choice for heart health savvy population. Soy lecithin also find applications in cosmetics and pharmaceuticals industries owing to its antioxidant properties. The global soy lecithin market valued USD XX billion in 2018 and is estimated to reach USD XX billion by 2026, at a CAGR of XX% during the forecast period.

**Market Dynamics:**

The rising demand for lecithin from various industries including food, feed, pharmaceuticals, and cosmetics owing to its emulsification properties is the major factor driving the growth of global soy lecithin market. Emulsifiers are finding new applications in various food categories such as protein powders, desserts, bakery products, and functional beverages. Furthermore, the need for emulsifying agents is also increasing in the production of animal feed and pet food. The wide availability and protein-rich nature of soy made soy lecithin as an effective emulsifier in these applications. The inexpensive process of soy lecithin production is motivating the use of soy as a preferred source for lecithin over egg, rape seeds and other counterparts. Soy lecithin is extracted as a byproduct of soybean oil production. The growing production of soy production is also supporting the growth of soy lecithin market.
Fermentation is considered as one of the early preservation techniques in food industry owing to its potential benefits on human gut health and immune system. Food ingredients such as amino acids, organic acids, and enzymes are used in fermented mode to enhance the nutritional and preservative qualities. Fermented food ingredients are naturally derived through microbial fermentation of real food and are used as natural preservatives in various food and beverages. Food manufacturers across the globe use these naturally derived ingredients to deliver fresh taste of their food products over the shelf-life. These are used in wide array of food products such as dairy, bakery products, prepared meals, deli meats, and various other food and beverage products. The global fermented ingredients market valued USD XX billion in 2018 and is estimated to reach USD XX billion by 2026, at a CAGR of XX% during the forecast period.

Market Dynamics:

Addition of artificial preservatives such as benzoates, sorbates, sulfites, and nitrates causes several disorders. The rising awareness among health-savvy population about the use of these artificial preservatives is increasing the demand for fermentation based ingredients. The consumers are looking towards fermented ingredients and considering it as a key factor in purchase decision. This is motivating food manufacturers towards use of fermented ingredients. Furthermore, the regulations associated with use of artificial and chemical preservatives in food products is supporting the growth of fermented ingredients market. The development of organic, gluten-free and claim of non-GMO fermented ingredients are likely to drive the market growth over the forecast period. However, the misconceptions prevailing among certain sections of people about consumption of food derived from microbial cultured ingredients is hindering the market growth.
Freezing is one of the most widely used preserving method in food industry. Meat is also processed to negative temperature to preserve it till consumption. Freezing enhances the shelf life of meat products thus enabling retail sale and trade to foreign markets. Several meat processors across the globe are producing frozen beef, pork, chicken, and other meat products to cater the need for frozen meat.

The global frozen meat market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Market Dynamics:

Frozen meat market has been witnessing significant growth owing to the growing for convenience food. The changing food habits and fast pacing lifestyles of population, particularly millennials has been driving the need for convenient ready-to-eat food products. The frozen meats are pre-portioned and are supplied in ready to cook stage, thus reducing the preparation time. Restaurants, food chains, and other food service businesses across the globe are highly focusing towards integration of frozen meat to their aisles owing to the long shelf life and preserved nutritional content of these products. According to the data published in Investopedia, the global shipments of frozen chicken meat increased from USD 16.10 billion in 2017 to USD 16.8 billion in 2018.
Pet nutraceuticals are micronutrients, macronutrients, and nutritional supplements intended to use as therapeutic agents in companion animals. Currently, pet nutraceuticals are available for both disease management and health promotion through conventional pet foods and individual supplements. The consumption of nutraceuticals provides several benefits to pet including immune regulation, improved metabolic activities and control or elimination of infection by bacteria, viruses and parasites. Pet nutraceuticals are strictly regulated in the United States and European Union to ensure safety and efficacy verification. Increasing veterinary healthcare costs associated with growing awareness among the pet owners towards health maintenance of pets through supplements is the major factor driving the market.

The global pet nutraceuticals market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

The growing trend of pet ownership and increased spending by the pet owners for health maintenance of pets are the factors driving the growth of global pet nutraceuticals market. Growing presence of aging pet population and decreasing bone health led to shift in pet owner preference towards precautionary bone health maintenance through supplementation. The measures adopted by pet owners towards weight and anxiety management of pets led to increased sales of pet nutraceuticals across the globe. Furthermore, muscle health, joint health, eye, and tooth care of pet animals evolved as the key concerns of pet owners. The lack of required doses of essential nutrients in domestically made pet food is motivating the pet owners towards additional supplements.
Global Organic Pet Food Market - 2019-2026

Organic pet foods use certified organic ingredients and are free from pesticides, growth hormones, synthetic fertilizers, antibiotics, by-products & bioengineering. Organic pet food possess high levels of nutrition and it comprises of organic meats, fruits, vegetables, minerals & vitamins. The key benefits associated with organic pet food includes longer life expectancy of pets, healthier lifestyle, fewer diagnostic disorders, healthy weight and decreased occurrence of ailments and allergies in companion animals. Growing demand for organic and all-natural pet food from pet owners across the globe owing to its zero-chemical nature is the major factor driving the global organic pet food market.

The global organic pet food market valued USD XX million in 2018 and it is expected to grow at a CAGR of XX% to reach USD XX million by 2026.

Market Dynamics:

The rising pet anthropomorphism and growing awareness towards adverse health effects of synthetic pet food is resulting in significant consumer shift towards organic pet food. Large spectrum of pet parents in the U.S. and the European region treat pets as members of their families. This has resulted in feeding pets with human grade ingredients. The pet owners are turning more conscious towards their pet health and are focusing on safety and nutritional efficacy of the food they feed to their pets.

Global Food Flavors Market (2019-2025)

The food Flavor is a preparation added to food products to boost or impart a distinctive Flavor, to preserve the Flavor after processing, to alter an already existing Flavor, and to guise an unwanted Flavor. Growing demand for ready-to-eat, processed and canned products is driving the industry worldwide. Other factors, such as technology innovation, the advent of new tastes, and large capital inflows into R&D activities, are also driving the growth of the market.

The increasing disposable income especially of the young and middle-class customers helps to increase demand for food Flavors. In addition, the increasing product developments by food and drink manufacturing firms is helping to introduce new products to attract prospective customers in the new and existing industry. The accessibility to fake and inexpensive food Flavorings ingredients however impedes the development in the prospective industry of meat Flavorings. The increase in organized retail chains in the developing countries, which are largely dependent on revenues of distinct types of food and beverages, contributes to the development of demand for food Flavor products of varying types.

A comprehensive research report created through extensive primary research (inputs from industry experts, companies, stakeholders) and secondary research, the report aims to present the analysis of Global Shea Butter Market. The report analyses the Shea Butter Market of 4 regions (North America, Europe, Asia Pacific, Rest of the World) and 10 countries that includes U.S., Canada, Brazil, U.K. Germany, France, Italy, China, India & South Korea. The Shea Butter market of the 4 regions and 10 countries have been analysed by value and by volume. The data has been presented for the historical period of 2014-2018 and the forecast period of 2019-2024.

According to Azoth Analytics research report, the Global Shea Butter market value is projected to display a robust growth represented by a CAGR of 6.27% by value and 7.90% by volume during 2019-2024.

Over the recent years, Shea Butter market has been witnessing considerable growth on the back of increasing demand for chocolate in emerging and developing nations and growing urban population. Moreover, rise in the demand for heathy and nutritious food and rising number of high-net-worth individuals has been driving the market of Shea Butter globally. Further, increasing demand for cosmetics and personal care products is expected to drive market growth in forecast period. Among the countries, US, Germany & U.K accounts for the largest share in the Global Shea Butter Market in 2018.

Global Carotenoids Market (2019-2025)

The Global Carotenoids Market size is expected to reach $2 billion by 2025, rising at a market growth of 4.7% CAGR during the forecast period.

Carotenoids or tetraterpenoids are orange, yellow, and red organic pigments obtained from plants and algae, and several kinds of bacteria and fungi. A carotenoid helps to give characteristic color to carrots, pumpkins, tomatoes, corn, flamingoes, canaries, and daffodils. These are produced from fats and basic organic metabolic building blocks by all these organisms. Carotenoids are produced from two main sources, animals and whiteflies. Among animals, only aphids and spider mites have been able to acquire the ability and genes from fungi. Further, whiteflies have endosymbiotic bacteria which produce carotenoids.

Beta Carotene is used in food, feed, cosmetics, dietary supplements, and medical products and it will encourage business functionality. It is a colour, antioxidants and a rich source of vitamin A. Astaxanthin is expected to maintain its largest market share among various products because of its increasing use in animal feed ingredients, human antioxidants and shrimp, salmon, and trout colouring. Moreover, the growth of the industry will be supported by properties such as the rapid recovery of the wound and human stamina improvement.
Global Online Food Delivery and Takeaway Market (2019 Edition) -
Analysis By Order Type (Delivery, Takeaway & Dine-in), By Region, By Country: Market Insights, Company Analysis, Opportunity Assessment and Forecast (2014-2024)

A comprehensive research report created through extensive primary research (inputs from industry experts, companies, stakeholders) and secondary research, the report aims to present the analysis of Global Online Food Delivery and Takeaway Market. The report analyzes the Global Online Food Delivery and Takeaway Market By Order Type (Delivery, Takeaway & Dine-in). The report analyses the online food delivery market By Region (North America, Europe, APAC, ROW) and By Country (US, Canada, UK, Italy, Spain, France, Netherlands, China, Japan, India, Australia, Brazil, UAE) for the historical period of 2014-2018 and the forecast period of 2019-2024.

According to the research report published by Azoth Analytics in September 2019, the Global Online Food Delivery and Takeaway Market was valued at USD 53,578.5 million the year 2018. Globally, the growth in the market for Online Food Delivery and Takeaway has been chiefly supported by ever increasing youth population with growing internet penetration in most of the countries around the world backed with escalating smartphone users and enhanced number of consumers opting online delivery platforms due to convenience and ease of delivery at their doorstep. The Global Online Food Delivery and Takeaway Market is projected to display a robust growth represented by a CAGR of 16.46% during 2019 - 2024.

Food Processing Seals Market by Material and Geography - Global Forecast and Analysis 2019-2023

Technavio's food processing seals market analysis considers sales from metals, face materials, elastomers, and others in APAC, Europe, North America, South America, and MEA. In 2018, the metals segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as higher frictional coefficients will play a significant role in the metals segment to maintain its market position. Also, our global food processing seals market report looks at factors such as increasing demand for poultry, dairy, bakery, and confectionery products, growing demand for processed and convenience food, and stringent government regulations. However, volatility in raw material prices, seal-less equipment, and growing demand for fresh and organic food products may hamper the growth of the food processing seals industry over the forecast period.
**Frozen Breakfast Foods Market by Distribution Channel and Geography - Global Forecast and Analysis 2019-2023**

Technavio's frozen breakfast food market analysis considers sales from hypermarkets and supermarkets, grocery and convenience stores, and online retail. Our analysis also considers the sales of frozen breakfast food in APAC, Europe, North America, South America, and MEA. In 2018, the hypermarkets and supermarkets segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as easy purchasing process for consumers and the availability of a diverse range of products will play a significant role in the hypermarkets and supermarkets segment to maintain its market position. Also, our global frozen breakfast food market report looks at factors such as increasing launch of new products, widened reaching of vendors through organized retailing, and rising popularity of organic and vegan frozen breakfast food. However, frequent product recalls, health risks associated with consumption of frozen breakfast food, and warehousing challenges of frozen breakfast food may hamper the growth of the frozen breakfast food industry over the forecast period.

**Mexico Baby Food, 2019**

Mexico's birth rate remains among the highest in Latin America, but the number of births has been generally downward. The population comprises a large group of people living in poverty and a smaller group of middle and upper income consumers, and it is the latter that are the main purchasers of industrially prepared baby food. Nonetheless, sales are high and expanding, led by milks, although wet meals and cereals performed nearly as well. The sector is fairly traditional, with products such as pouches and liquid milks only launched in the last four years. The majority of baby food is produced domestically.

Mexico has become a major exporter, particularly of milks and sweet meals. Nestle continues to dominate, accounting for over half of sales. It has a virtual monopoly of cereals and drinks, accounts for 85% of wet meals, and leads in baby milks. Only Heinz challenges Nestle in wet meals. In milks, Mead Johnson and Aspen lie second and third, followed by Abbott, Danone and FrieslandCampina. Pharmacies remain a significant distribution channel, dominating the supply of milks, but supermarkets and hypermarkets account for over half of value sales. Consumption is expected to grow during the next six years, fueled by the relatively buoyant state of the economy (though this will depend on political and economic relations with the US), and increased manufacturer competition, slightly offset by declining birth numbers.
Global Plant-Based Food & Beverages Alternatives Market: Focus on Product Type (Plant Based Meat and Plant Based Dairy), Source (Soy, Almond, Corn and Wheat), and Distribution Channel - Analysis and Forecast, 2019-2024

Published by BIS Research Inc. Pub. Date 2019/08/28

USD 2500 PDF by E-mail (Single User License) ~
USD 5000 PDF by E-mail (Global License)

Technavio’s industrial chocolate market analysis considers sales from both confectionery, biscuits and bakery products, dairy and desserts, ice creams and frozen items, and cereals and other industrial chocolate applications. Our analysis also considers the sales of industrial chocolate in Europe, North America, South America, and MEA. In 2018, the confectionery segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as rising demand for industrial chocolate from end-users will play a significant role in the confectionery segment to maintain its market position. Also, our global industrial chocolate market report looks at factors such as growing consumer awareness about the health benefits of dark chocolate, rising demand for ruby chocolates, and technological innovations in the industrial chocolate supply chain. However, fluctuations in the prices of cocoa and sugar, stringent regulations regarding quality of industrial chocolate, and product recall of chocolate at various levels of the supply chain may hamper the growth of the industrial chocolate industry over the forecast period.
Food Waste Management Market by Disposal Method and Geography - Global Forecast and Analysis 2019-2023

Technavio's food waste management market analysis considers sales from landfill, recycling, and incineration disposal method. Our analysis also considers the sales of food waste management in APAC, Europe, North America, South America, and MEA. In 2018, the landfill segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as low costs of landfilling will play a significant role in the landfill segment to maintain its market position. Also, our global food waste management market report looks at factors such as growing concern about carbon emissions, conversion of food waste into bio-based products and organic fertilizers, and increasing implementation of regulations and favorable policies. However, increasing risks of fire accidents, high operating and maintenance costs, and the adverse impact of incineration on environment may hamper the growth of the food waste management industry over the forecast period.

Frozen Pizza Market by Product, Distribution Channel, Toppings, and Geography - Global Forecast and Analysis 2019-2023

Technavio's frozen pizza market analysis considers sales from regular frozen pizza, premium frozen pizza, and gourmet frozen pizza. Our analysis also considers the sales of frozen pizza in APAC, Europe, North America, South America, and MEA. In 2018, the regular frozen pizza segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as the increasing demand for low-budget pizza and new product launches will play a significant role in the regular frozen pizza segment to maintain its market position. Also, our global frozen pizza market report looks at factors such as new product launch, increasing mergers and acquisitions, and packaging innovations. However, product recall, increasing obesity and related diseases among the consumers, and challenges in storing frozen food products may hamper the growth of the frozen pizza industry over the forecast period.

Overview

New product launches

Currently, market vendors are increasingly focusing on new product launches to increase their market share. For instance, Cappello's launched a new line of gluten and grain-free frozen pizza featuring an almond crust and made from cage-free eggs, cassava flour, and other ingredients. Similarly, Caulipower LLC (Caulipower) launched a low-calorie and gluten-free frozen pizza product with a cauliflower crust which is available in different varieties, including Three Cheese and Margherita. Such product launches will increase the number of available options for consumers and consequently fuel the growth of the global frozen pizza market at a CAGR of over 4% during the forecast period.
The India frozen pizza market is accounted to US$ 550.0 Thousands in 2018 and is expected to grow at a CAGR of 14.8% during the forecast period 2019 - 2027, to account to US$ 1,842.2 Thousands by 2027. Pizza is an Italian dish which has different toppings and tastes and has become famous all over the world. It usually consists of a round, flattened base of leavened wheat-based dough topped with tomatoes, cheese, and various other ingredients (anchovies, olives, meat, etc.). India frozen pizza market is in the initiation stage and has a presence in only metro cities. The changing food habits and lifestyles of consumers have propelled the growth of the Indian market for fast foods and convenience foods. With an improved line of pizza products such as paneer tikka pizza and tandoori pizza, companies are capturing the market share and leading to the growth of India frozen pizza market.

The Indian frozen pizza market based on crust type has been segmented into thin crust, thick crust, and others. Thick crust dominated the frozen pizza market in India in 2018 because these crust types comprise more toppings than the thin crust type. Thick crust pizza is made by rolling the dough of a pizza into thick sheets, and thus, this type needs more cooking time than thin-crust pizza types. It uses thicker ingredients and thicker dough, requiring different water-to-flour ratios, which helps increase the viscosity of dough. Frozen thick crust pizzas are prepared with more toppings than thin crusts which are contributing to people’s likeliness toward thick crust frozen pizza.

Technavio’s rice syrup market analysis considers sales from both conventional rice syrup and organic rice syrup. Our analysis also considers the sales of rice syrup in APAC, Europe, MEA, North America, and South America. In 2018, the conventional rice syrup segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as the increasing influence of online retailers will play a significant role in the conventional rice syrup segment to maintain its market position. Also, our global rice syrup market report looks at factors such as rising demand of rice syrup from the food services industry, rising number of organized retailing outlets and online retailers offering rice syrup, and increasing popularity of organic rice syrup. However, rising popularity of substitutes, instability in prices of raw materials and rising penetration of new players and threat of contamination in rice syrup may hamper the growth of the rice syrup industry over the forecast period.
US Dairy Free Creamer Market to 2027 - Regional Analysis and Forecasts by Form; Nature; Flavor; End-Use; Distribution Channel

The US dairy free creamer market is accounted to US$ 3,750.0 Mn in 2018 and is expected to grow at a CAGR of 3.2% during the forecast period 2019 - 2027, to account to US$ 4,989.1 Mn by 2027. Dairy free creamers are also known as tea whiteners or coffee whiteners. Dairy free creamer is liquid or granular substances used as a substitute for milk or cream. It is added to coffee, tea, hot chocolate, or other beverages. This type of creamers does not contain lactose and therefore, are commonly described as being non-dairy products. Some dairy free creamers contain sweeteners and flavors, such as vanilla, hazelnut or Irish cream. Dairy free creamer is considered to be one of the staples in the non-dairy food category in the US. The growth of the dairy free creamer market is mainly attributed to the rising consciousness among consumers related to the benefits of plant-based and vegan diet.

The US dairy free creamer market by form is bifurcated in powder and liquid. The liquid dairy free creamer segment dominated the US dairy free creamer market. Easy availability of powered form dairy free creamer and its wide application in the food and beverage processing, bakery products, and infant food are key factors propelling the demand for powdered dairy free creamer market. Moreover, the liquid segment is projected to grow at a faster pace over the forecast period as the number of trans fats is limited in the liquid dairy free creamer. Trans fats are harmful as they increase the risk of heart disease. Therefore, the rise in awareness about the health driving the liquid dairy free creamer market growth.
Global Market Study on Lentil Protein: Plant-based 'Rebranded' as Vegan

The latest market report by PMR on the global lentil protein market evaluates the opportunities and current market scenario, and provides insights and updates about the corresponding segments involved in the global lentil protein market during the forecast period 2019-2029. The global lentil protein market report further exhibits the estimated data for 2019, and forecast data up to 2029 in the terms of value (US$ millions ) and volume (Tonnes). In terms of value, the global lentil protein market is expected to grow at a healthy CAGR of ~ 5% over the forecast period. The present study exhibits the trends and market dynamics of the lentil protein market in seven major regions - North America, Latin America, Europe, South Asia, East Asia, Oceania and the Middle East & Africa. The report also includes the study of the current issues with consumers, and various future opportunities for the lentil protein market.

Lentil Protein Market: Report Description

The report explores the global lentil protein market for the period 2019-2029. The primary objective of the global lentil protein market report is to provide insights into the opportunities in the market that are consistently supporting the transformation of global businesses associated with lentil protein. It is very important to consider that, in an ever-wavering economy, we provide the estimated (Y-o-Y) year-on-year growth rate, in addition to the compound annual growth rate (CAGR) for the overall forecast, to better understand the analysis and evaluation of the global lentil protein market, and to discover equitable opportunities.

Squalene Market by Source Type (Animal Source (Shark Liver Oil), Vegetable Source (Olive Oil, Palm Oil, Amaranth Oil), Biosynthetic (GM Yeast)), End-use Industry (Cosmetics, Food, and Pharmaceuticals), and Region - Global Forecast to 2024

Published by MarketsandMarkets
Pub. Date 2019/08/23
Price
USD 5650 PDF by E-mail (Single User License) ~
USD 10000 PDF by E-mail (Global License)

The squalene market is estimated to grow from USD 140 million in 2019 to USD 204 million by 2024, at a CAGR of 7.8%. The squalene market is driven mainly by increasing sales of cosmetics and pharmaceuticals. The growing cosmetics industry in emerging markets such as Brazil, China, and India; increasing consumer awareness of the usage of high-quality cosmetic products; and willingness to pay premium prices are driving the cosmetics industry at the global level.

The growth in the pharmaceuticals industry will be a major driver for the demand for squalene in the future. Increasing R&D in the oncology segment along with increasing spending on oncology medicine is expected to drive the market for squalene in the coming years. Additionally, the rising awareness about the beneficial properties of squalene such as anti-oxidation, anti-aging, strengthening of the immune system, and UV protection is driving the growth of the market.
Fruit Tea Market by Type and Geography - Global Forecast and Analysis 2019-2023

Technavio's fruit tea market analysis considers sales from both conventional fruit tea and organic fruit tea. Our analysis also considers the sales of fruit tea in APAC, Europe, North America, South America, and MEA. In 2018, the conventional fruit tea segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as affordable and easily accessible fruit tea products will play a significant role in the conventional fruit tea segment to maintain its market position. Also, our global fruit tea market report looks at factors such as increasing demand for premium fruit tea, packaging innovations in the market, growing demand from emerging countries. However, volatility in prices of raw materials, rise in the number of product recalls, and the increasing threat of substitutes may hamper the growth of the fruit tea industry over the forecast period.

Global Food Traceability Market Forecast 2019-2027

Food traceability involves the ability to track food in the supply chain stage and provide information about product quality. According to Inkwood Research, the global food traceability market is anticipated to flourish with a CAGR of 6.19% from 2019 to 2027. The market is expected to generate a revenue of $18561.91 million by 2027. The rising necessity to detect food contamination and assist the minimization of food recalls is one of the primary factors driving the growth of food traceability market on a global scale.

MARKET INSIGHTS

The food traceability market is classified into several segments, namely end-users, equipment, application, and technology. The food traceability systems have wide applications in various types of foods such as fisheries, fresh produce & seeds, dairy, beverages, meat & livestock, and others. Applications in fisheries are expected to showcase a significant growth owing to the changing guidelines in several countries that make traceability of fisheries and seafood mandatory. Further, the globalization of the fish industry upsurge the demand for traceability, thereby boosting the food traceability market growth.
Non-dairy Yogurt Market by Product and Geography - Global Forecast and Analysis 2019-2023

Technavio’s non-dairy yogurt market analysis considers sales from almond-based, soy-based, coconut-based, and others. Our analysis also considers the sales of non-dairy yogurt in APAC, Europe, North America, South America, and MEA. In 2018, the almond-based segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as multiple health benefits on the consumption of almond-based yogurt will play a significant role in the almond-based segment to maintain its market position. Also, our global non-dairy yogurt market report looks at factors such as rising number of product launches, increasing awareness about health benefits of non-dairy yogurt products, and growing prominence of vegan food. However, fluctuating prices of ingredients used in product formulation, stringent regulations related to marketing and labeling of non-dairy yogurt products, and an increasing number of product recalls may hamper the growth of the non-dairy yogurt industry over the forecast period.

Fish Sauce Market by Product and Geography - Global Forecast and Analysis 2019-2023

Technavio's fish sauce market analysis considers sales from both industrial and traditional fish sauce. Our analysis also considers the sales of fish sauce in APAC, Europe, North America, South America, and MEA. In 2018, the industrial fish sauce segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as convenience in the use of industrial sauce compared to the traditional fish sauce will play a significant role in the industrial fish sauce segment to maintain its market position. Also, our global fish sauce market report looks at factors such as new product launches, increasing global fish production, and wide application of fish sauce. However, increasing fish allergy among consumers, availability of substitutes, and declining krill population may hamper the growth of the fish sauce industry over the forecast period.

Overview

Wide application of fish sauce

Fish sauce is used for cooking a variety of dishes. It helps in adding savory flavor to food products and is used to prepare dishes such as grilled chicken, pasta sauce, and salad dressings. The increase in the number of people that prefer to cook at home than dine out will also drive market growth during the forecast period. The cost-conscious consumers have reduced their restaurant visits and expenditure on food products at food-service outlets. Thus, the wide applications of fish sauce will lead to the expansion of the global fish sauce market at a CAGR of over 5% during the forecast period.
**Aronia Berries Market by Distribution Channel and Geography - Global Forecast and Analysis 2019-2023**

Technavio’s Aronia berries market analysis considers sales from both offline and online distribution channel. Our analysis also considers the sales of Aronia berries in APAC, Europe, North America, South America, and MEA. In 2018, the offline segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as the increasing number of retailers providing private label Aronia berry products will play a significant role in the offline segment to maintain its market position. Also, our global Aronia berries market report looks at factors such as the health benefits of Aronia berries, product launches, and rise in the number of private label brands. However, high ownership cost of Aronia berries, stringent food safety regulations, and availability of substitutes may hamper the growth of the Aronia berries industry over the forecast period.

**Thailand Baby Food, 2019**

USD 9825 PDF by E-mail (Global License)

After a period of economic difficulty and political unrest, the situation in Thailand has improved. Baby food sales remain fairly sluggish compared with the boom years, but have risen in real value terms and in volume over the past four years. The number of live births has continued to decline. Most families with sufficient disposable income to buy baby food are in Bangkok and other large urban areas.

In rural areas, industrially prepared baby foods are neither widely available nor affordable for many mothers. With the exception of milks, all categories remain extremely underdeveloped. An increasing number of foreign brands that were previously imported into Thailand are now produced locally. In addition, several domestic baby food companies are now active. The top three multinationals hold over 90% of sales.

Most are involved primarily or exclusively in the milks category. Nestle holds the lead, well clear of Danone. Two US companies, Mead Johnson and Abbott, make up the bulk of the remainder. Heinz is dominant in meals, but this gives it only a small share of overall baby food sales. The majority of baby food sales are made through food outlets, primarily hypermarkets and supermarkets. A small and decreasing proportion of baby milk is also sold via pharmacies. Demand is forecast to show steady growth, with higher per capita consumption in all categories, offsetting the expected decline in the number of births.
Technavio’s dry honey market analysis considers sales from both conventional dry honey and organic dry honey. Our analysis also considers the sales of dry honey in APAC, Europe, North America, South America, and MEA. In 2018, the conventional dry honey segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as low cost and growing awareness about the health benefits of conventional dry honey will play a significant role in the conventional dry honey segment to maintain its market position. Also, our global dry honey market report looks at factors such as health benefits of consuming dry honey, healthy ingredient in food products, and growth in organized retailing globally. However, the declining number of honeybee colonies, availability of substitutes, and increasing adoption of honey dehydration at home may hamper the growth of the dry honey industry over the forecast period.

The global aquaponics market is expected to grow at a CAGR of 12.8% from 2019 to reach $1.4 billion by 2025. The factors such as growing fish consumption, rising demand for organic fruits and vegetables, improvement in urban farming methods, growing reduction in arable land areas, and changing climate conditions are driving the growth of the global aquaponics farming market.

The global aquaponics farming market is primarily segmented by equipment (grow lights, pumps and valves, fish purge systems, in-line water heaters, aeration system, and other equipment), product type (fish, vegetables, herbs, and fruits), application (commercial, home production, and other applications), and geography.

On the basis of equipment type, grow lights segment is estimated to command the largest share of the global aquaponics market in 2019, mainly due to its rising adoption in indoor farming as it is an essential part of the indoor farming required for plant photosynthesis. Based on product type, with the high nutritional profile and changing lifestyle, the fish segment is projected to grow at the highest CAGR during the forecast period.
Plant Based Protein Market by Type (Soy Protein, Wheat Protein, Pea Protein, Potato Protein, Rice Protein, Corn Protein) and Application (Foods and Beverage, Animal Feed, Nutrition and Health Supplements, Pharmaceuticals) - Global Forecast to 2025

The global plant based protein market is expected to grow at a CAGR of 8.1% from 2019 to reach $14.32 billion by 2025.

Succeeding an extensive secondary and primary research and in-depth analysis of the market scenario, the report carries out an impact analysis of the key industry drivers, restraints, opportunities, and challenges. The growth of this market is mainly attributed to increasing awareness about the benefits of protein and growing demand for protein rich diet, growing health & wellness trend, increasing consumers' focus on meat alternatives, growing demand from food & beverage industry, and various advancements in ingredient technologies such as microencapsulation. Additionally, new and emerging sources of proteins, increasing inclination towards vegan diet, and emerging economics such as Southeast Asia, Latin America, and Middle East & Africa provide significant growth opportunities for plant based protein manufacturers in the coming years. However, growing soy free and gluten free trend challenges the growth of this market to some extent.

Nutritional products are not drugs but a food that can regulate the function of the human body after taking it. For example, improve immunity, vitamin supplements, etc. The main purpose of taking health supplements is to prevent disease rather than treat it.

In 2018, the global Nutraceutical Products market size was xx million US$ and is forecast to xx million US in 2025, growing at a CAGR of xx% from 2019. In this study, 2018 has been considered as the base year and 2019 to 2025 as the forecast period to estimate the market size for Nutraceutical Products.

This study researches the market size of Nutraceutical Products, presents the global Nutraceutical Products sales and revenue by companies, regions, type and application, history breakdown data from 2014 to 2019, and forecast to 2025.

This report focuses on the key data information of Nutraceutical Products in key regions like North America, Europe, China and Japan, presents sales, revenue, market share, growth rate of Nutraceutical Products for each region and countries in each region.
Bakery Products Market by Product and Geography - Global Forecast and Analysis 2019-2023

Technavio's bakery products market analysis considers sales from bread and rolls, cakes and pastries, cookies, and others. Our analysis also considers the sales of bakery products in APAC, Europe, North America, South America, and MEA. In 2018, the bread and rolls segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as increase in the demand for gluten-free products will play a significant role in the bread and rolls segment to maintain its market position. Also, our global bakery products market report looks at factors such as increasing retail value sales of private-label bakery products, strong distribution network between manufacturers and customers, and growing prominence of gluten-free bakery products. However, volatility of raw material prices, intense competition among vendors, and stringent regulations leading to product recalls may hamper the growth of the bakery products industry over the forecast period.

Global Non-Alcoholic Beer Market Insights, Forecast to 2025

This report researches the worldwide Non-Alcoholic Beer market size (value, capacity, production and consumption) in key regions like Europe, MEA, Japan, North America and other regions.

This study categorizes the global Non-Alcoholic Beer breakdown data by manufacturers, region, type and application, also analyzes the market status, market share, growth rate, future trends, market drivers, opportunities and challenges, risks and entry barriers, sales channels, distributors and Porter's Five Forces Analysis.

In 2018, the global Non-Alcoholic Beer revenue was increased to 3504 million US$ from 2997 million US$ in 2014, and it will reach 4464 million US$ in 2025, growing at CAGR of 3.52% between 2018 and 2025.

The following manufacturers are covered in this report:

- Anheuser-Busch InBev
- Carlsberg
- Suntory Beer
- Arpanoosh
- Aujan Industries
- Weiheinstephan
- Heineken
- Behnoush Iran
- Asahi Breweries
- Krombacher Brauerei
- Erdinger Weibbrau
- Kirin
**Food Safety Testing - Global Market Outlook (2017-2026)**

According to Stratistics MRC, the Global Food Safety Testing is accounted for $13,144.00 million in 2017 and is expected to reach $27,618.24 million by 2026 growing at a CAGR of 8.6% during the forecast period. Increase in application of pesticides in agriculture and high application preservatives are the key driving factors for the market growth. However, Prevalence of traditional methods accompanied by higher cost of rapid technology is one of the factor hindering the market.

Food safety testing refers to the inspection of food products for disease-causing organisms, chemicals, and other hazardous materials. It is generally targeted at three primary food contaminants namely, pathogens, chemicals, and genetically modified organisms (GMOs). Food fraud is committed when food is deliberately altered for financial gains with the intention of deceiving consumers. The food standards agency (FSA) specifies two main types of food frauds namely, sale of food that is unfit and potentially harmful and deliberate misdescription of food.

---

**Hydrolyzed Plant Protein Market by Product and Geography - Global Forecast and Analysis 2019-2023**

Technavio's hydrolyzed plant protein market analysis considers sales from hydrolyzed soy protein, hydrolyzed pea protein, and hydrolyzed wheat protein. Our analysis also considers the sales of hydrolyzed plant protein in APAC, Europe, North America, South America, and MEA. In 2018, the hydrolyzed soy protein segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as growing demand for hydrolyzed soy protein in animal feed will play a significant role in the hydrolyzed soy protein segment to maintain its market position. Also, our global hydrolyzed plant protein market report looks at factors such as increasing demand for plant-based diets, increased use of plant protein in food and beverages, and rising demand for hydrolyzed plant protein in animal feed. However, uncertainties in the health issues associated with hydrolyzed plant proteins, stringent food safety regulations and guidelines, and high competition in the global hydrolyzed plant protein market may hamper the growth of the hydrolyzed plant protein industry over the forecast period.
Anti-Aging Nutraceutical Ingredients - Global Market Outlook (2017-2026)

According to Stratistics MRC, the Global Anti-Aging Nutraceutical Ingredients market is growing at a CAGR of 6.8%. Factors, such as increasing awareness among customers with respect to nutraceutical ingredients, natural formulations utilization for products, informative product packaging, attributable to purchaser tendency towards product information are fuelling global anti-aging nutraceutical ingredients market growth. However, high cost of the products is right now abstaining a majority of consumers falling in the middle to low pay bunch from buying these products, which is incredibly hindering the development of this market at present.

Nutraceuticals have medicinal properties to treat or prevent diseases and they are food or parts of foods in the form of nutrients. Nutraceuticals foods have high antioxidant properties and are beneficial in fighting the causes of anti-aging. The free radicals produced by the body when cells in our body use oxygen, may cause oxidative damage to the body. Thus, these nutraceuticals help in preventing the side effects of those free radicals.

Organic Farming - Global Market Outlook (2017-2026)

According to Stratistics MRC, Global Organic Farming is accounted for $53.16 million in 2017 and is expected to reach $129.97 million by 2026 growing at a CAGR of 10.4% during the forecast period. Increasing demand for organic food, rising awareness of natural, and new food safety standards for health and well-being coupled with consumers to pay for organic farm food are the key driving factors for the market growth. However, high production cost of organic farming is some of the factors hindering the market growth.

Organic farming is a method that involves growing and nurturing crops with the use of biological materials preventing the use of synthetic based fertilizers and pesticides. Also, the use of genetically modified organisms is not permitted. Organic farming systems have a great potential to provide the world with healthy, high-quality food.

Based on the method, Weed management has considerable demand during the forecast period. Organic weed management promotes weed suppression, rather than weed elimination, by enhancing crop competition and phytotoxic effects on weeds. Organic farmers incorporate cultural, biological, mechanical, physical and chemical tactics to manage weeds without synthetic herbicides. By geography, Asia Pacific is expected to have a good demand during the forecast period, owing to increasing government initiative in promoting organic farming by providing subsidies on organic fertilizers.
Soy Milk - Global Market Outlook (2017-2026)

According to Stratistics MRC, the Global Soy Milk market is accounted for $14.44 billion in 2017 and is expected to reach $28.40 billion by 2026 growing at a CAGR of 7.8%. The factors such as increasing demand for lactose-free food products due to the ease of digest which is likely to contribute significantly to the revenue growth of soy milk market. However, the exceptional taste of the soy milk which significantly differs from the cow milk, the rise of other dairy alternatives and rivalry from beverage manufacturing industries are restraining the market growth.

Soy milk is a kind of grain milk, which is a steady emulsion of oil, water, and protein. It is delivered by drenching dry soybeans and grinding them with water. Soy is normally wealthy in basic unsaturated fats, proteins, fiber, nutrients, and minerals, which makes a sound beverage just as it is a brilliant wellspring of nutrient A, nutrient D, nutrient B, and magnesium. Since soy milk does not contain lactose, it is a reasonable solid beverage for lactose narrow minded individuals, and it gives all the nourishing advantages to the buyers with no antagonistic impacts.

Thailand aquafeed market reached a consumption volume of 1.07 Million Tons in 2018. Thailand has the most sophisticated commercial aquafeed manufacturing industry. It has one of the world’s largest shrimp and fish production industries which play a significant role in the country’s economy. Rising exports of fishery products across various countries have increased the demand of aquafeed in the country. Moreover, all the required raw materials are easily available in the country that helps in the rapid development and production of fish feed such as corn, soybean, fish meal etc. Apart from this, rising awareness among consumers about the high-protein content of seafood has encouraged the farmers to use improved aquafeed. Additionally, new technologies are being introduced in the country to improve the feed quality in order to attain higher productivity. In addition, due to drug and chemical residue problems, farmers who culture freshwater shrimp have started using more commercial feed instead of on-farm mixed feed. Looking forward, IMARC Group expects the Thailand aquafeed market to reach a volume of 1.48 Million Tons by 2024, registering a CAGR of 5.43% during 2019-2024.
**Meat Extract Market (Meat: Beef, Chicken, Pork, Lamb; End Use: Food Processing, Lab Testing; Form: Powder, Liquid, Granules, Paste) - Global Industry Analysis, Size, Share, Growth, Trends, and Forecast, 2019 - 2029**

The global aquaculture market accounted for US$ 264,470.0 in 2018 and is expected to grow at a CAGR of 7.7% during the forecast period 2019 - 2027, to account to US$ 509,743.0 Mn by 2027. Aquaculture includes farming of fish, aquatic plants, algae, crustaceans, molluscs, and other organisms. Small-scale aquaculture market in developed and developing countries make critical contributions to employment. According to the FAO, aquaculture provides employment to more than over 41 million people globally.

The vast majority of aquaculture activities are carried out in developing countries working in fish production. Fish and other seafood species constituting an important source of nutrients for the poor and is among the cheapest form of animal protein. As most capture fisheries worldwide considered fully exploited or overexploited, aquaculture is considered as an important sector to meet rising fish demand, which will continue to increase with population growth, rising incomes and increasing urbanization. These factors are anticipated to boost the growth of the aquaculture market.

Top Growth Opportunities for Bakery & Cereals in Denmark provides recommended actions and detailed analysis of how to target the best growth opportunities for Bakery & Cereals producers and retailers. Readers can understand what categories, channels, companies, and consumers will drive the success of Bakery & Cereals markets in Denmark through GlobalData's detailed and robust data, expert insight, and case studies.

GlobalData's Top Growth Opportunity reports use a risk versus reward opportunity model to identify the best growth markets for Bakery & Cereals producers. Through this in-depth study of market and category dynamics, readers are able to identify key opportunities, and what they need to do in order to target them.

Top Growth Opportunities for Bakery & Cereals in Denmark provides an overview of the Bakery & Cereals market, analyzing market data, demographic consumption patterns within the category, and the key consumer trends driving consumption. GlobalData's proprietary Risk vs Reward Opportunity model pinpoints the best growth opportunities for Bakery & Cereals producers, suppliers and retailers by combining robust, granular data and expert insight. The report uses this framework to identify the best opportunities, analyze white spaces in the market, and outline new product development that will effectively target the most pertinent consumer need states. These are combined to offer strategic recommendations to capitalize on evolving consumer landscapes.

Propolis Market by Application and Geography - Global Forecast and Analysis 2019-2023

Technavio's propolis market analysis considers sales from healthcare, personal care and cosmetics, and food and beverages. Our analysis also considers the sales of propolis in APAC, Europe, North America, South America, and MEA. In 2018, the healthcare segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as antifungal, antibacterial, and antioxidative nature of propolis will play a significant role in the healthcare segment to maintain its market position. Also, our global propolis market report looks at factors such as health benefits of consuming propolis, availability of propolis dietary food supplements, and growing preference for online shopping. However, uncertainties in the declining number of honeybee colonies, improper storage facilities may lead to decomposition of propolis-based products, and adulteration of propolis products may hamper the growth of the propolis industry over the forecast period.
Bovine Serum Albumin Market by Form (Dry, Liquid), Grade (Technical- & Diagnostic-Grade, Research/Reagent-Grade, Food Grade), End User (Life Sciences Industry, Feed Industry, Food Industry, Research Institutes), and Region - Global Forecast to 2025

The global bovine serum albumin market is estimated to be valued at USD 255 million in 2019 and is projected to reach USD 304 million by 2025, recording a CAGR of 3.0%. Factors such as the low cost and stable nature of BSA as a protein standard and the increasing livestock population leading to a growing demand for blood-based products are driving the growth of this market.

The scope for the use of BSA as a dietary protein is opening new avenues for the application of BSA. It has been established that BSA is a dietary whey protein that has anti-obesity effects. The intake of BSA as a part of low-fat diets prevents weight gain. Since obesity is a growing problem, the manufacturers are looking at cost-effective solutions for the production of dietary supplements. The cost of raw material for the production of BSA is very low due to which it has the potential to be used as a dietary supplement.

The global dairy products market is expected to grow at a CAGR of 5.2% from 2019 to reach $645.8 billion by 2025.

Succeeding an extensive secondary and primary research and in-depth analysis of the market scenario, the report carries out an impact analysis of the key industry drivers, restraints, opportunities, and challenges. The high growth of dairy products market is mainly attributed to rising population and urbanization, increase in consumer awareness level regarding nutritional food, and growing acquisitions in dairy space. However, growing demand for dairy alternatives and milk allergy and lactose intolerance are expected to hamper the growth of dairy products market.

Based on type, dairy products market comprises of milk, cheese, butter, cream, yoghurt, milk powder, desserts, and other dairy products. The milk segment accounted for the largest share of the global dairy products market, as it is the most consumed and marketed dairy product across the globe as well as due to increased production in last two decades and significant improvements in all the unit operations of milk processing.
Global Cattle Management Software Market Size, Status and Forecast 2019-2025

Cattle management software is a system that assists farmers to record and keep track of their cattle from birth all the way to sale.

In 2018, the global Cattle Management Software market size was xx million US$ and it is expected to reach xx million US$ by the end of 2025, with a CAGR of xx% during 2019-2025.

This report focuses on the global Cattle Management Software status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Cattle Management Software development in North America, Europe, China, Japan, Southeast Asia, India and Central & South America.

The key players covered in this study

- Chetu
- CattlePro
- Lion Edge Technologies
- HerdMASTER
- Herdtrak
- Sum-It Computer Systems
- Folio3
- CattleXpert
- Midwest MicroSystems
- Shearwell

Global Poultry Management Software Market Size, Status and Forecast 2019-2025

Poultry Management Software is a software that can analyses performance and detects problems early via an early warning system. Poultry management software is a management tool that helps people plan, optimise business processes and take well-founded decisions.

In 2018, the global Poultry Management Software market size was xx million US$ and it is expected to reach xx million US$ by the end of 2025, with a CAGR of xx% during 2019-2025.

This report focuses on the global Poultry Management Software status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Poultry Management Software development in North America, Europe, China, Japan, Southeast Asia, India and Central & South America.
Global Feed Management Software Market Size, Status and Forecast 2019-2025

Feed Management Software is a software that makes it easy to optimise & create Product Feeds for farmers and culturists.

In 2018, the global Feed Management Software market size was xx million US$ and it is expected to reach xx million US$ by the end of 2025, with a CAGR of xx% during 2019-2025.

This report focuses on the global Feed Management Software status, future forecast, growth opportunity, key market and key players. The study objectives are to present the Feed Management Software development in North America, Europe, China, Japan, Southeast Asia, India and Central & South America.

The key players covered in this study

- Products Up
- DataFeedWatch
- VersaFeed
- Boostmyfeed
- Amelicor
- GoDataFeed
- Channable
- Shoptimised
- 3dcart
- iRely

Plant Genomics Market by Objective (Extraction, Sequencing, Genotyping, Gene Expression, MAS, and GMO-trait Purity Testing), Type (Molecular Engineering and Genetic Engineering), Trait, Application, and Region - Global Forecast 2025

The global plant genomics market is estimated to be valued at USD 7.3 billion in 2019 and is projected to reach USD 11.7 billion by 2025, recording a CAGR of 8.3%. Factors such as the rise in demand for improved crop varieties, the cost-effectiveness of genomics, and the rise in plant genome funding are factors that are projected to drive the growth of this market.

The herbicide tolerance segment, by trait, is projected to be the largest segment in the plant genomics market during the forecast period.

Herbicide-tolerant crops have unique traits, which makes them resistant to the effects of herbicides, which, in turn, makes the application of herbicides easier. In crop management, as weeds are the main cause for economic losses, herbicides are extensively applied to control the same; however, excessive use of herbicide during the agricultural practices is detrimental. The usage of herbicide-tolerant seeds offers farmers a more flexible and simple weed control system.

A new research study published by Persistence Market Research (PMR) offers a perspective on the growth trajectory of 'Phytochemicals Market' for the period between 2019 and 2029. The study includes a thorough assessment of historical and current trends of the phytochemicals market that can have significant impact on its future growth prospects. The business intelligence report offers credible insights on various aspects and nuances of the phytochemicals market that can help the stakeholders in well-informed decision-making.

PMR's details drivers, restraints, trends, and challenges in the phytochemicals market to identify lucrative opportunities for the market vendors. In addition, the report offers forecast statistics of the phytochemicals market in terms of value (US$ million) and volume (tons). It also covers several sections explaining the global outlook on urbanization growth, F&B industry, pharmaceutical industry, and nutraceutical industry.

In the report, readers can find detailed taxonomy of the phytochemicals market in line with an incisive outlook on the competitive scenario. The report highlights a wide range of incumbent companies as well as new entrants in the phytochemicals market, wherein, development strategies, portfolios, and new launches of each market player have been mentioned.
Breakfast Cereal Manufacturing Global Market Forecast to 2022

The breakfast cereals manufacturing market consists of sales of breakfast cereals such as corn flakes, muesli and porridge oats by entities (organizations, sole traders and partnerships) that produce breakfast cereal products. The companies in the industry process raw materials into breakfast cereals, package and distribute them through various distribution channels to both individual customers and commercial establishments.

Breakfast Cereal Manufacturing Global Market Forecast To 2022 from The Business Research Company provides the strategists, marketers and senior management with the critical information they need to assess the global breakfast cereal manufacturing market.

Food Product Machinery Manufacturing Global Market Forecast To 2022

Where is the largest and fastest growing market for the food product machinery manufacturing? How does the market relate to the overall economy, demography and other similar markets? What forces will shape the market going forward? The Food Product Machinery Manufacturing market global report from the Business Research Company answers all these questions and many more.

The report covers market characteristics, size and growth, segmentation, regional and country breakdowns, competitive landscape, market shares, trends and strategies for this market. It traces the market’s historic and forecast market growth by geography. It places the market within the context of the wider industrial machinery manufacturing market, and compares it with other markets.

Global Alcoholic Beverages Market Size, Share & Trends Analysis Report by Type (Beer, Distilled Spirit, and Wine), by Packaging Type (Glass Bottles, Cans, and Others), and Forecast, 2019 - 2025

The demand for alcoholic drinks is growing at a significant rate in recent years. The increase in demand for premium alcoholic drinks is considered to be one of the primary factors driving the market. Additionally, efforts made by alcoholic beverage manufacturers for focusing their go-to-market strategy by strengthening distribution channels and extension of purchase channels such as online stores and convenience store is also propelling the growth of global alcoholic beverages market. Further, manufacturers are continuously launching new products with the blend of new flavors which may enable them to attract more consumer base; thereby, leading to the market growth.

The market is mainly segmented on the basis of type, packaging type, and region. On the basis of type, the market is segmented into beer, distilled spirit, and wine. Beer is expected to dominate the overall market share and further expected to continue this trend over the forecast period. Distilled spirit is expected to follow beer segment in terms of revenue generation over the forecast period. The growth of the distilled spirit segment is attributed to the increase in premium and super premium whiskey consumption and significant shift of consumer from consumption of beer to consumption of distilled spirits such as rum, whiskey, vodka, and others. Furthermore, on the basis of packaging type, the market is segmented into glass bottles, cans, and others.

USD 5000 PDF by E-mail (Global License)

www.giiresearch.com/ce/906349

Technavio’s food flavors market analysis considers sales from both natural flavors and artificial flavors. Our analysis also considers the sales of food flavors in APAC, Europe, MEA, North America, and South America. In 2018, the natural flavors segment had a significant market share, and this trend is expected to continue over the forecast period. Factors such as nutritional value and enhanced taste will play a significant role in the natural flavors segment to maintain its market position. Also, our global food flavors market report looks at factors such as growing demand for natural food flavors, new product launches, increasing demand for food flavors in processed foods. However, uncertainties in stringent food safety regulations and guidelines, health issues related to artificial food flavors, and high competition in the global food flavors market may hamper the growth of the food flavors industry over the forecast period.

Overview

Increasing demand for food flavors in processed foods

The demand for flood flavors in processed foods is high in comparison to whole foods because of their taste, appearance, and texture, which attract many consumers. The need for minimal preparation and ready to eat properties of ultra-processed foods make it highly popular among consumers. Natural and artificial flavors are widely used as additives in processed foods. This demand for food flavors in processed foods will lead to the expansion of the global food flavors market at a CAGR over 5% during the forecast period.

USD 5650 PDF by E-mail (Single User License) ~
USD 10000 PDF by E-mail (Global License)

The global nutraceutical products market size is projected to grow from USD 267.4 billion in 2019 to USD 404.8 billion by 2025, recording a CAGR of 7.2% during the forecast period. The growth in the aging population and the rising number of chronic diseases are encouraging manufacturers to produce nutrition-rich products. Further, the increasing demand for fortified food due to their health benefits is projected to drive the growth of the nutraceutical products market. However, consumer skepticism associated with the adoption of various nutraceutical products and high costs associated with these products are factors projected to hinder the market growth of nutraceutical products.

"The beverage segment in the nutraceutical products market is projected to be the fastest-growing segment."

Nutraceutical beverages such as sports drinks, energy drinks, juices, and ready-to-drink tea and coffee-based beverages are witnessing high demand due to the growing number of sports enthusiasts and inclination toward active nutrition. Moreover, the consumption of protein-based beverages is increasing due to the increasing demand among health-conscious consumers for protein-rich beverages. Furthermore, manufacturing companies are focusing on introducing new fortified functional beverages due to the increasing consumer inclination toward healthy beverages fortified with several organic and nutraceutical ingredients.

Global Food Enzymes Market Forecast 2019-2027

Published by Inkwood Research
Price
USD 2500 PDF (Single User License) ~
USD 4500 PDF (Enterprise License)

www.giiresearch.com/ce/904357

The global food enzymes market will grow with an anticipated CAGR of 5.57% during the forecast period & will reach revenue of $3,500 million by 2027. The base year considered for the market study is 2018 & the forecasted period is between 2019 & 2027. Growth in food & beverages market is regarded as a prime driver for the growth of the global food enzymes market.

MARKET INSIGHTS

Global food enzymes market growth is hindered by restraining characteristics of enzymes and allergies. People are prone to allergies with food enzymes, which might negatively impact the growth of the global market. Also, the presence of stringent regulations regarding biological products is expected to hamper the growth of agricultural enzymes market in the coming years.

Bakery ingredients are the leading segment in terms of revenue in the global food enzymes market with around XX% market share in 2018. Demand for enzymes is expected to rise as consumers prefer natural products which are free of chemicals.

Global Chilled & Deli Food Market Size, Share & Trends Analysis Report by Type (Meat, Pre-Packaged Products, Prepared Salad, Pies & Savory Appetizers, Sauces, Condiments & Dressing, and Others) and Forecast, 2019-2025

Chilled and deli foods are ready-to-eat food products that can be kept in freezers or refrigerators for a long time. They are readily available consumables good which have a high shelf life and even maintain their qualities and nutrients in a frozen state. Increasing demand for readily available food options, changing lifestyle and expansion of supermarkets and hypermarkets are some of the factors which drive the global chilled & deli food market. Moreover, increasing demand for meat and dairy products in frozen form is expected to further augment the growth of the market in the near future. However, the growing use of synthetic preservatives and increasing private label brands are some of the factors which will hinder the growth of the market. The companies operating in chilled & deli food market includes 2 Sisters Food Group (SFG), Astral Foods Ltd., BRF S.A., Hain Daniels Group, Hormel Foods Corp., JBS USA Food Co., Kraft Heinz Co., Nestle S.A., and Samworth Brothers among others.

According to MarketsandMarkets, the global oleoresins market is estimated to be valued at USD 1.2 billion in 2019 and is projected to reach USD 1.7 billion by 2025, recording a CAGR of 6.0% from 2019 to 2025. Factors such as the increasing awareness about the side-effects of synthetic flavors and health benefits associated with natural extracts are projected to drive the growth of the oleoresins market during the forecast period.

"By source, the paprika segment is accounted for the largest share in 2018."

The paprika segment accounted for a major share in the global oleoresin market, on the basis of source, in 2018. Due to the growing imports of paprika from the European and North American countries, the demand for paprika-based oleoresins has also increased. The increasing application of paprika oleoresins as a natural food ingredient and coloring agent makes it a preferred choice for food manufacturers over raw paprika. Moreover, increasing awareness about the benefits of food products with low salt levels is projected to drive the growth of the paprika segment in the oleoresins market during the forecast period.

The bakery & cereals sector in the Asia-Pacific was the third largest market globally with a value share of 20.8% in 2018. It was valued at US$110,438.9 million in 2018 and is expected to grow at a CAGR of 5.7% during 2018-2023. Cakes, Pastries & Sweet Pies was the largest category in the sector, accounting for 32.2% of overall value sales in the same year. The APAC bakery & cereals market was fragmented with the top five companies accounting for just 11.9% of overall value sales in 2018. Hypermarkets & supermarkets was the leading distribution channel in the region with a total value share of 41.3%, while flexible packaging was the most commonly used pack material in the sector.

This report brings together multiple data sources to provide a comprehensive overview of the region’s bakery & cereals sector. It includes market overview, high growth country analysis, top brands, key distribution channels, packaging formats and case studies.

USD 2500 PDF by E-mail (Single User License) ~  
USD 5000 PDF by E-mail (Global License)  
[www.giiresearch.com/ce/336112](http://www.giiresearch.com/ce/336112)

Whiskey is an alcoholic beverage, which is distilled from malted grains such as rye, corn, or barley. Technavio’s whiskey market analysis considers sales from the Scotch whiskey, American whiskey, Canadian whiskey, Irish whiskey, and other segments. The sales are made through off-trade and on-trade distribution channels. Our analysis also considers the sales of whiskey in APAC, Europe, MEA, North America, and South America. In 2018, the Scotch whiskey segment held the highest market share, which is expected to remain prevalent over the forecast period. Factors such as the rising popularity of Scotch whiskey-based tourism, increasing promotional activities by Scotch whiskey brands to attract customers, and presence of many Scotch whiskey distilleries will significantly help the market segment in maintaining its leading position. Also, our global whiskey report has observed market growth factors such as increasing number of product launches, opening of new whiskey distilleries, and growing popularity of whiskey-based tourism. However, product recalls, increasing availability of other alcoholic beverages, and increasing number of campaigns to reduce alcohol consumption may hamper the growth of the whiskey industry over the forecast period.
Food Processing Market Report: Trends, Forecast and Competitive Analysis

According to a new market report published by Lucintel, the future of the food processing market looks promising with opportunities in beverage, dairy, meat & poultry, convenience food & snacks, fruits & vegetables, and seafood industries. The food processing market is expected to reach an estimated $4.1 trillion by 2024 with a CAGR of 4.3% from 2019 to 2024. The major drivers for this market are increasing demand for ready-to-eat food products, changing lifestyle, and increase in nuclear families and working women.

Emerging trends, which have a direct impact on the dynamics of the industry, include development of food processing technologies that reduce detrimental changes in food and maintain the nutritional value. Cargill Foods, Nestle, PepsiCo, Archer Daniels Midland, and Unilever are among the major processed food manufacturers.

A total of 144 figures / charts and 122 tables are provided in this 237-page report to help in your business decisions. Sample figures with some insights are shown below.

Middle East and Africa Weight Management Market: Industry Trends and Forecast to 2026

Middle East & Africa weight management market is projected to register a substantial CAGR in the forecast period of 2019 to 2026. The new market report contains data for historic year 2017, the base year of calculation is 2018 and the forecast period is 2019 to 2026.

Market Segmentation:

By Type (Equipment, Services, Supplement), Diet (Meals, Beverages, Nutraceuticals), Application (Weight Maintenance, Body Shaping, Sports Injuries, Aesthetic Procedures, Chronic Wound Management, Others), Distribution Channel (Multi-Level Marketing, Large Retail, Small Retail, Health and Beauty Stores, Online, Others), End User (Fitness Centers & Health Clubs, Consulting Services & Commercial Weight Loss Centers, Online Weight Loss Programs, Slimming Centers, Others), Country (South Africa, Rest of Middle East & Africa).
Teff is a fine grain primarily grown in Ethiopia and Eritrea. Teff grows in both waterlogged soils and droughts, making it a dependable staple food. The color of teff varies from Yellowish Brown to Ivory based on the environmental and soil conditions. White and ivory have the mildest flavor, while darker varieties have sour after fermentation and sweet & light in flavor before fermentation. Teff is rich in calcium & Iron and consumption of teff based products provide several health benefits to the consumer. The currently available teff based food products available in the market include bread, muffins, chocolates, waffles, and porridge.

The global teff products market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Market Dynamics:

Corn, barley, and wheat are considered as staple food for large group of population across the globe. However, wheat and barley are rich in gluten and the growing prevalence of gluten related diseases such as celiac and gluten ataxia is surging the need for gluten free alternatives. Teff evolved as an effective solution to cater the need for gluten free diets owing to its gluten-free and nutrient rich nature. The high nutrition content in teff is well suitable for celiac patients who usually suffer from mineral malabsorption. Due to its low glycemic index, it is suitable to eat for type 2 diabetes patients. According to Celiac disease foundation, prevalence of celiac disease was 4% in South America, 0.5% in Africa and North America, 0.8% in Europe and Oceania.

Agriculture genomics is an application of genomics in agriculture to improve the productivity and sustainability in crop production. Genomics can reduce the trails associated with scientific research, which could in turn improve the quality and quantity in crop yield. Various agrigenomics processes adopted by the researchers and academia includes plant genotyping, genetic engineering, gene expression analysis, GMO testing and detection, and genome sequencing. Food Security is major threat and traditional methods of plant and animal production will not meet the demand from world's population. Growing adoption of genomic driven breeding and through analysis through next generation sequencing technologies is revolutionizing the agriculture industry. The additional benefits associated with agrigenomics includes reduced breeding cycles, greater selection intensity, improved accuracy=y and increased rate of genetic gain in plants.
Global Vertical Farming Market - 2019-2026

Published by DataM Intelligence

The decreasing arable land and depleting natural resources is motivating the crop growing communities towards effective farming practices that follow the 'law of minimum'. Vertical farming, which involves controlled production of plants in multiple vertical layered setups, such as controlled-environment buildings, repurposed warehouses, growth chambers and shipping containers evolved as a solution. The major advantages associated with vertical farming includes reduced agricultural runoff, optimized energy usage, minimum overheads, and low labour costs. The use of innovative irrigation systems and lighting methods enable vertical farming to support food production throughout the year.

The global vertical farming market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

India Coffee Cafe Market By Segment (International and Domestic), By Service (In Dine and Take Way), By Product Offering (Coffee, Tea, Other Beverages, Snacks and Others), Competition, Forecast & Opportunities, 2024

Published by TechSci Research

The global production of carrots and turnips was 44.3 million metric ton in 2018 and is expected to register a CAGR of 3.4% during the forecast period (2019-2024). The demand for carrots and turnips has increased in the year 2017 globally, especially in the China due to the fact that it is purchased for home use. In US demand is increasing due to the popularity of baby carrots being used as a snack instead of other junk foods. The major importers of carrots and turnips are Germany, Canada and US.

Scope of the Report

The global carrots and turnips market is segmented by geography into North America, Europe, Asia-Pacific, South America, and Africa. China is the world’s leading producer of carrots and turnips accounting for nearly 48.2% of the total output. The increasing demand in China is encouraging the producers to enhance the carrots and turnips production globally.

Key Market Trends

Trend of Baby Carrots Gaining Popularity

The development of the consumer market and rapid increase in popularity of ready-to-eat packaged foods led to invention of baby carrots in US. These are made from longer carrots that have been peeled and cut into smaller size. The major demand of baby carrots is in US, Germany, Canada, UK, France, and China. Bolthouse farms and Grimmway farms are leading producers of baby carrot in US. The campaign by Bolthouse focused on replacing carrots and modifying the packaging to have it resemble junk foods with much lower calories and better nutrition.
**South America Cashew Market - Growth, Trends, and Forecast (2019 - 2024)**

South America is globally regarded as the place of origin of cashews. Major cashew growing countries in the region are Brazil, Chile, Colombia, Bolivia, amongst others. The United States and the other North American countries are the major cashew trade partners of South America. The largest importing countries in terms of value are Vietnam, India, and the United States.

Scope of the Report

Cashew nuts are edible kidney-shaped nuts, rich in oil and protein, and are roasted and shelled before eaten. Oil extracted from the shells is used as a lubricant, in the production of plastics. South America cashew market is segmented by geography into Brazil, Argentina, Chile, Colombia, Peru and others. The report provides an in-depth analysis of the South American cashew market. The study discusses the scope, size, and growth of the industry.

Key Market Trends

Increasing Export Demand from US and European Countries

Brazil is currently focusing on trade events through its Agency for Promotion of Exports and Investments (APEX) for the popularity and growth of its cashew trade. Many small South American countries are focusing on supply-chain development and competitive pricing to boost their export demand. The South American countries like Brazil, Argentina, Chile, and Ecuador possess high potential for trade in the region. Such initiatives are bolstering the trade of country’s shelled cashew nuts, while the trade of raw cashew nuts are more or less observed to be the same, as the country is highly dependent on imports of processed cashew nuts rather than on in-shell forms.
The automatic tea bag packaging equipment market is expected to register a CAGR of over 5% during the forecast period (2019 to 2024). According to FAO Intergovernmental Group (IGG), growing consumption of tea is driven by the increasing awareness of its antioxidant, inflammatory, and weight loss effects.

- Global tea production and consumption are anticipated to keep rising over the next decade, driven by the robust demand from emerging economies of China and India among others, owing to higher incomes and efforts to diversify production to include specialty items, such as herbal teas, fruit fusions, and flavored gourmet teas.
- Sustainability is also one of the primary concerns in the tea bag packaging industry. As a result, packaging equipment manufacturers are increasingly adopting automation in their production line and adhering to Sustainable Trade Initiatives throughout the globe.
- The RTD (Ready-to-Dink) tea and instant tea market are burgeoning across the world, with Asia-Pacific, the United States, and Europe as the largest consumers of RTD products. These teas are convenient and offer a healthy alternative to other ready-to-drink beverages. The RTD market for tea has witnessed strong growth with several entrants looking to tap this opportunity. For instance, in 2018, 8th Wonder Tea, a US-based company launched ready-to-drink teas to meet the rising demand for high-quality teas on-the-go.
Global Condiments Market -2019-2026

The Global Condiments Market is expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Condiments are substances that are used to add flavor to the food and beverages. It can be spice or the sauce and has strong flavors. These special spices and sauces are usually added at the table, just before eating, and the kind and amount used depends on the specific flavors or tastes a person likes. Different culture has their own condiments that help improve the flavor of the local dishes.

Global Condiments - Market Dynamics

The global Condiments is primarily driven by rising popularity of organic and gluten-free condiments as due to the growing consciousness of the people towards having healthy food which have rich ingredients. To cater to this increasing demand for the healthy condiments the manufacturers are focusing on new products launch which further boost the popularity of clean-labeled, specialty, organic, and gluten-free condiments.

For Instance, Stokes Sauces, which is famous for its range of delicious artisan sauces, is launching a brand-new line of 'squeezy' family-friendly, recyclable bottles for the food service industry in May 2019. The quality condiment producer from Suffolk is taking on the big brands in the sector with its squeezy range and is releasing its famous Tomato Ketchup, Real Mayonnaise and Brown Sauce in the new format bottles.
Global Food Testing and Certification Market - 2019-2026

The Global Food Testing and Certification market is expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026. With the emergence of various food protection and regulatory acts which are mandating the testing and certifications of the food products, will further result increase in the demand for food testing and certification services over the forecast period.

Food Testing s used as a scientific discipline describing handle, preparation, and storage of food in ways that prevent food-borne illness. Food safety considerations include the origins of food including the practices relating to food labeling, food hygiene, food additives, and pesticide residues, as well as policies on biotechnology and food and guidelines for the management of governmental import and export inspection and certification systems for foods.

The report covers all the major trends and drivers playing a key role in the growth of the Food Testing and Certification market. Food Testing and Certification market are segmented by Testing, Technology, Food & Feed, and Region.

Market Dynamics

The global Food Testing and Certification is primarily driven by the rise in population coupled with the rapid urbanization and rise in the disposable income of the people all around the world has resulted in the strong growth of the food & beverage industry. Growing food safety concerns owing to increasing outbreaks of foodborne disease is driving the food safety testing and certification market growth. So, rising concern due to diseases has made the government take this seriously.
Global Empty Capsules Market - 2019-2026

A capsule is the encapsulation of dosage forms, in a relatively stable shell, allowing them to be taken orally or be used as suppositories. Empty capsules are the most common option to store herbs, powders and medicines. Mainly there are two types of capsules - Hard-shelled capsules, containing dry, powdered ingredients and miniature pellets which are made through extrusion or spheronization. The global empty capsules market size was worth $ XX billion in 2018 and is forecasted to reach $ XX billion by 2026, at a CAGR of XX% during the forecast period (2019-2026).

Empty Capsules Market Dynamics

The global empty capsules market is growing due to several factors such as, growing geriatric population, increasing incidence of chronic diseases, and advancement in product by manufacturers.

The increased prevalence of geriatric population associated with chronic conditions imposes a high demand to produce medicines to treat chronic health conditions. The geriatric population mostly prefers capsules in the solid dosage forms as they are easy to swallow, they have faster dissolution times, and the decreased gastrointestinal irritation caused by capsules. In 2017, the number of Americans ages 65 and older was around 46 million, and it is expected to be 98 million by 2060.

Asia-Pacific Weight Management Market: Industry Trends and Forecast to 2026

Asia-Pacific weight management market is projected to register a healthy CAGR in the forecast period of 2019 to 2026. The new market report contains data for historic year 2017, the base year of calculation is 2018 and the forecast period is 2019 to 2026

Market Segmentation:

By Type (Equipment, Services, Supplement), Diet (Meals, Beverages, Nutraceuticals), Application (Weight Maintenance, Body Shaping, Sports Injuries, Aesthetic Procedures, Chronic Wound Management, Others), Distribution Channel (Multi-Level Marketing, Large Retail, Small Retail, Health and Beauty Stores, Online, Others), End User (Fitness Centers & Health Clubs, Consulting Services & Commercial Weight Loss Centers, Online Weight Loss Programs, Slimming Centers, Others), Country (Japan, China, South Korea, India, Australia, Singapore, Thailand, Malaysia, Indonesia, Philippines, Rest of Asia-Pacific).
Global Feed Anticoccidials Market - 2019-2026

Anticoccidials are the agents that are used for control and prevention of coccidian infections in animals. Coccidiosis is considered as a major disease economically in poultry, swine, and cattle. Anticoccidials are administered to animals as injections or as oral medications across the globe. In-feed anticoccidials evolved as the preferred choice of medication owing to the restrictions and bans imposed on the use of antibiotics in animal health. The global feed anticoccidials market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Market Dynamics:
Growing prevalence of Coccidiosis in poultry industry is the major factor driving the global feed anticoccidials market. According to the study published in National Institute of Health in 2018, the overall prevalence of Coccidiosis in poultry was about 54.28% across the poultry farms in Algeria. The huge economic loss imposed by Coccidiosis increased the demand for in-feed anticoccidials from commercial farmers in poultry industry. According to the study published by Ayurvet Limited in 2018 states that more than USD 2.4 Billion was incurred over poultry industry alone due to coccidian infections. Growing livestock production activities and poultry population is also driving the growth of anticoccidial feed additives market.

The Global Frozen Vegetables is expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Freezing is one of the most used processes for conservation of foods. This process is based on the heat removal of the food to be conserved, by keeping the temperature sufficiently low at the point to considerably hindering or reducing the destructive action of the microorganisms, oxygen and enzymes on the product. The characteristics of the vegetables such as size, internal structure and cellular membrane thickness affect the patterns of the freezing process. The vegetable freezing is a widely used process since it presents higher efficiency in the preservation of the physiochemical and sensorial qualities of the vegetables.

Global Frozen Vegetables - Market Dynamics

The global Frozen Vegetables Market is primarily driven by rise in dual income household and hectic lifestyle of the people all around the world supported by increase in the awareness of consuming the healthy food among the people will be driving the market during the forecast period. Frozen vegetable is mostly lie under organic food category. In US, the demand for organic foods is primarily driven by personal health and environmental reasons and the United States has seen organic food sales growth from last five years. In addition, the approximately 50% of the population in The US includes organic food in their diet.

India Condiments Market By Type (Sauces & Ketchup, Pickle, Mayonnaise & Dressings & others), Distribution Channel (Hypermarket/Supermarket, Convenience Stores, Traditional Stores & Online/E-commerce), Competition Forecast & Opportunities, 2014-2024

India condiments market stood at $ 638.96 million in 2018 and is projected to grow at a CAGR of over 13%, to reach $ 1340.5 million by 2024. Anticipated growth in the market can be attributed to increasing cross-cultural interaction, inclination towards consumption of western food & cuisines and growing number of modern retail outlets offering price and convenience advantages to the customers. Moreover, increased focus on R&D activities in food industry has brought various development in food quality and innovations in products such as sugar-free and gluten free condiments which is stimulating the trend of healthy living. This factor is expected to provide ample opportunities for condiments market during the forecast period. Additionally, emergence of diet sauces and other condiments is also expected to fuel growth in the market. Furthermore, increasing standards of living, changing lifestyle and rising demand for sophisticated taste in meal are emerging trends in the industry.
Walnut Market - Growth, Trends, and Forecast (2019 - 2024)

The Global Walnut Market is projected to register a CAGR of 6.0% over the forecast period (2019-2024). Due to the high amount of nutritional content and health benefits, walnuts are considered to be one of the most important species of tree nuts and are consumed worldwide. They help heart function, bones health, and skeletal system and contain a number of neuroprotective compounds, including vitamin E, folate, melatonin, omega-3 fats, and antioxidants.

- The production of walnuts in China is estimated to be around 850,000 metric ton in 2018. The production is estimated to lower by 15%, due to the effects of the previous year's damage caused by frost. Adequate stocks in the country and high international walnut prices are expected to affect the demand for walnuts in China during 2018-2019, which is expected to keep the imports lower.
- China and the United States are projected to dominate the walnut market, both in terms of production and consumption, globally, over the forecast period.
- It is estimated that close to 50% of the walnuts produced worldwide moves into retail consumption while usage in the food processing industry as an ingredient in the manufacture of nut butter, bakery products, confectionery, and other similar products constitutes 42%.

Global Weight Management Market: Industry Trends and Forecast to 2026

Global weight management market is projected to register a substantial 6.4% CAGR in the forecast period of 2019 to 2026. The new market report contains data for historic year 2017, the base year of calculation is 2018 and the forecast period is 2019 to 2026.

Market Segmentation:

By Type (Equipment, Services, Supplement), Diet (Meals, Beverages, Nutraceuticals), Application (Weight Maintenance, Body Shaping, Sports Injuries, Aesthetic Procedures, Chronic Wound Management, Others), Distribution Channel (Multi-Level Marketing, Large Retail, Small Retail, Health and Beauty Stores, Online, Others), End User (Fitness Centers & Health Clubs, Consulting Services & Commercial Weight Loss Centers, Online Weight Loss Programs, Slimming Centers, Others), Geography (North America, Europe, Asia Pacific, South America, Middle East & Africa).
Yogurt is a dairy product produced by bacterial fermentation of milk and is considered as the best source of probiotics for human gut health. Yogurt is widely consumed as part of diet owing to its rich in nature of nutrients including calcium and protein. The growing consumer interest towards convenience food products resulted in evolution of drinkable yogurt. The fast paced lifestyles of young and adult population resulted in increasing adoption of these yogurt drinks as breakfast and snacking. Furthermore, the innovation of drinkable yogurt blended with new flavors such as Aloe Vera and coconut is strengthening the adoption of yogurt drinks among health conscious population. According to Alove, a U.S. based Yogurt drinks manufacturer operating as a subsidiary of Morinaga Nutritional Foods, Inc., Aloe Vera based yogurt drinks witnessed a growth of over 30% in terms of new product launches during 2017-2018 in U.S., thus forming a major growth segment of the market. Aloe Vera is also rich in antioxidants that help clear and calm the skin, thus making them drink of choice among female population.

Formate brines are the aqueous solutions of the alkali metal salts of formic acid. These salts are readily soluble in water, yielding high-density brines and known as high temperature fluids. They are solution of sodium, potassium, and cesium based formate in water. Various types of formates have different degree of solubility in water. They are receiving more responsiveness for its application in oil & gas exploration and deicing of fluids. Apart from the oil and gas industry, demand for formate brines is also increasing from chemicals, pharmaceuticals, food and beverage and leather industries worldwide.

The global Formate Brines market size was worth USD YY million in 2018 and is estimated to reach USD YY million by 2026, at a CAGR of YY% during the forecast period.

Market Dynamics

Extensive useful characteristics of formate brines in various applications is the major driving factor for the growth of the market. The demand for formate brines is estimated to increase in the long run owing to the consistent exploration actions in new and existing wells and oilfields worldwide. Low corrosiveness, non-critical health, safety and environmental (HSE) profile and environment-friendly and possibility of being recycled are the major useful characteristics for the market growth. Reduction of operating costs, maximization of hydrocarbon yields, minimization of liability because formate poses little risk in application and environmental compatibility are the key benefits of formate brines in oil and gas drilling.
Confectionery is the group of food products that are made with sugar or carbohydrates. There is wide collection of confectionery products across the globe and are majorly classified as chocolate confectionery, sugar confectionery, and bakers’ confectionery. Most of the well-known products such as candies, gums, lollipops, and chocolates are included in confectionery.

The global confectionery market valued USD XX billion in 2018 and is estimated to reach USD XX billion by 2026, at a CAGR of XX% during the forecast period.

Global Confectionery Market - Dynamics:

The health benefits associated with chocolate products is driving the growth of overall confectionery market, specifically dark chocolate. Dark chocolate is considered as a healthy snack owing to its nutrient content and its potential in lowering the risk of heart disease. Epidemiologists across the globe are suggesting consumption of dark and milk chocolate for heart health with clinically proven and study based facts. In a recent study of Harvard Medical School on 21,000 residents of England, it is found that consumption of up to 3.5 ounces of chocolate a day lowered the risk of heart disease in adults. Furthermore, innovations in the market in terms of flavor and nutritional content is driving the market growth. Global confectionery manufacturers are focusing on development of confectionery products with flavors such as coffee, fruits, cinnamon, and different ingredients.

Plant-based meat is a meat substitute derived from plant and other non-animal products to mimic natural meat in flavor, texture and all other properties. These products are majorly designed to be use as an effective alternative to chicken meat, pork, and beef. These plant based meat products are considered as sustainable solution to environmental concerns. The retail stores across the western countries are focusing towards sale of these products to cater the demand from growing vegan and vegetarian population.

Global Plant Based Meat Market - Dynamics

The growing demand for meat coupled with rising population and consumer preferences towards meat products is resulting in over slaughtering and depletion of animal sources. This is resulting in evolution of sustainability as a key purchasing factor among population particularly in millennials and GenX. Consumer concern towards environment and animal welfare are driving the demand for meat substitutes. Furthermore, stringent regulations laid by several state and federal governments towards raising and slaughtering of meat animals is boosting the growth of plant-based meat market.
Apiculture is a process of maintaining bee colonies to obtain honey and honey-based end products such as beeswax, propolis, royal jelly, and honey dew. Beekeeper aligns bees in an order through hives to collect honey and other by-products. Beekeeping was initially started in North Africa and expanded to Europe through Egypt in mid-18th Century. Increase in demand for honey and insufficient availability of natural honey led to increase in establishments of commercial farms for beekeeping across the globe. Key benefits associated with apiculture in commercial farms includes low maintenance and enhanced pollination activities across the farms.

The global Apiculture market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Global Apiculture Market Dynamics:

Growing demand for honey from various industries is the major factor driving the global apiculture market. The consumption of honey is rapidly surging in food and beverages industry as flavoring and sweetening agent owing to the adverse health effects of sugar-based sweeteners, thus providing equal market growth for global apiculture market. According to FAO, the annual production of honey in turkey increased from 106,000 tons in 2016 to 114 thousand tons in 2017 providing equal market growth for global apiculture market. The market has seen growing establishments of new colonies and beekeeping enterprises for honey production to cater the growing demand.
Global Bubble Tea Market -2019-2026

Published by DataM Intelligence
Price: USD 3750 PDF & Excel by E-mail (Single User License) ~ USD 7250 PDF & Excel by E-mail (Enterprise License)
Pub. Date 2019/08/01

The Global Bubble Tea Market is expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Bubble tea is a Taiwanese recipe made by blending a tea base with milk, fruit and fruit juices, then adding the signature "bubbles" - tapioca pearls that sit at the bottom. These fruit or tea infusions can be served either piping hot or iced cold, making a ever-so-quirky drink and snack. Bubble tea is usually served in transparent cups with a fat straw so that - as you sip - the tapioca balls (also known as "pearls" or "boba") come shooting up it and can be chewed as you swallow down the liquid. It's called bubble tea both because of the tapioca balls, and the floating "bubbles" created by the vigorous shaking involved in its blending.

Global Bubble Tea Market - Market Dynamics

The global Bubble Tea Market is primarily driven by health benefits that are associated with the bubble tea. The bubble tea with the base ingredients as green tea and black tea have various health benefits associated as reduced risk of cardiovascular disease, diabetes, arthritis and even cancer. This is due to the presence of polyphenols which have anti-inflammatory and antioxidant properties. Moreover, tea production rise in countries like China, India and others because of the increase in demand by the people as base ingredient in bubble tea.

Gluten-free Pizza Crust Market, By Types (Organic & Conventional), End Use (Retail & Bakeries), Distribution Channel (Online & Offline) & Geography -Analysis, Share, Trends, Size, & Forecast From 2014-2025

Egg processing refers to the series of activities that are undertaken to enhance the functional and safety properties of eggs and egg-based products. The process includes several actions starting from collection of eggs in production plant to final packaging and handling of processed egg products. The advantages of egg processing includes long shelf life, low bacteria contamination, ease of handling and storage. The global egg processing market valued USD XX million in 2018 and expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026.

Market Dynamics:

The growing consumer awareness towards benefits of processed foods and outbreak of bacterial contamination through egg products has driven the need for egg processing. Food manufacturers across the globe are focused on procurement of high-quality and nutritious egg products to cater this shifting preference of consumers.

Egg is considered as a major ingredient in various kinds of food products owing to its rich in protein nature and high nutrient content. The use of egg and egg-based products has significantly increased in bakery, confectionery, ice creams, and several other food categories.
Global Ready-to-drink Coffee Market - 2019-2026

The Global Ready-to-drink Coffee market is expected to grow at a CAGR of XX% to reach a market value of USD XX million by 2026. Due to the growing consciousness among people for healthy intakes is expected to fuel growth in the global Ready-to-drink (RTD) coffee market over the forecast period.

Ready to drink (RTD) coffee is a packaged coffee beverage which is sold in a prepared form, and ready for consumption. However, the packaging can be of various type such as PET bottled which is most common and others being as Canned, glass, and tetra pack.

The report covers all the major trends and drivers playing a key role in the growth of the Ready-to-drink Coffee market. The ready-to-drink coffee market is segmented by Packaging, Distribution Channel, and Region.

Market Dynamics

The global Ready-to-drink Coffee is primarily driven by the rising consciousness among the people for the consumption of the healthy food and beverages, and it is growing as the substitute for the carbonated drinks as people are shifting towards healthy intakes. Coffee contains several useful nutrients, including riboflavin (vitamin B-2), niacin (vitamin B-3), magnesium, potassium, and various phenolic compounds, or antioxidants. And hence have various health benefits such as coffee consumption lowers the risk of liver cancer by around 40%.

Fruits and Vegetables Industry in Colombia - Growth, Trends and Forecasts (2019 - 2024)

The Colombian fruits and vegetable market has reached to USD 18.7 million metric ton in 2018 and is expected to register a CAGR of 3.08% during the forecast period (2019-2024). With the growing importance of nutritional balance among various consumer groups, the consumption of fruits is expanding in the country. Banana, lemon, lime, berry, onion, orange, and pineapple among others are the highly traded commodities under fruits and vegetable segment of the country.

Due to the nutritional properties of fruits, in recent years, the consumption of minimally processed juices, beverages and smoothies have become an alternative for healthy eating habits, which will further boost the fresh produce of the country in the coming years.

Scope of the Report

Fruits and vegetables are an important supplement to the human diet as they provide the essential nutrients required for maintaining health. Colombia is one of the major producers of fruits and vegetables in the world and it produces several horticultural crops, namely banana, mango, pineapple, papaya, strawberry, avocado, potato, tomato, pepper and onion among others.

**Global Premium Lager Market - 2019-2026**

Lager is a type of beer conditioned at low temperatures. Lagers can be pale, amber, or dark. Pale lager is the most widely consumed and commercially available style of beer. Many premium lager vendors have gained high popularity among consumers because of its authentic taste. The adoption of the keg packaging and dispense format, especially by small producers, has been an important factor behind the increasing customer interest in the premium craft lager category.

**Global Premium Lager Market - Market Dynamics**

The global Premium Lager Market is primarily driven due to the premiumization of products within the lager category. Brewers operating worldwide are trying to push high-end products with an aim to lure consumers into spending more. The growth of the alcoholic beverages such as Premium Lager is driven by increase in global young-adult demographic, surge in disposable income, and rise in consumer demand for premium/super premium lager. In addition, new market strategies and creative packaging have been introduced by manufacturers. The growing number of specialist stores and shops worldwide has increased the accessibility and availability of premium lagers, which is one of the major drivers behind the growth of the premium lagers market over the last five years. The growth of the premium lager market is also supported by the frequent number of distribution deals between specialist retailers and vendors.

The global breakfast cereals market was worth $XX billion in 2018 and is forecasted to reach $XX billion by 2026, at a CAGR of XX% during the forecast period.

The fast-paced lifestyles across the globe has been forcing traditional breakfast foods such as porridges, buns and breads to get replaced by convenient products. The on-the-go Breakfast cereals evolved as healthy alternative owing to its nutritional benefits and convenience. Breakfast cereals are conventional food categories processed from grains such as Wheat, Oats, Rice, and Corn. Breakfast cereals are high in fiber and nutrients, and contain very low cholesterol. These food products are available as hot cereals and ready to eat cereals.

Global Breakfast Cereals Market Dynamics

The global breakfast cereals market growth is majorly driven by the need for nutritious food as breakfast to help fuel the physical and mental health. Rising risk of diseases such as Diabetes, Obesity, and cardiac issues owing to sedentary lifestyles is motivating people towards consumption of low-calorie food, thereby boosting the demand for breakfast cereals. A porridge made of whole grains contain zero cholesterol, thus making it ideal food for heart health. Furthermore, the growing cereal production across the world is also supporting the growth of breakfast cereals market. According to OECD-FAO Agricultural Outlook 2018-2027, the global cereal production is likely to grow by 13% between 2018 and 2027.

Dairy is one of the early food categories adopted by mankind and is considered as a major part of human nutrition. Dairy products are primarily produced from milk and commercial dairy include products ranging from liquid milk to processed products such as yogurt, cheese, butter, and others. The health benefits associated with milk has been motivating population of all segments towards consumption of dairy based products. Dairy is considered as a package of nutrients essential for a human body and is highly recommended as a source of calcium and healthy fats.

Global Dairy Products Market -Market Dynamics:

The nutritional benefits offered by dairy products is the major driver for the growth of global dairy products market. The rich content of vitamins, minerals, and proteins present in milk made dairy an essential food for humans. For instance, the calcium content of milk help develop healthy bones and teeth among young children, thus making it a vital part of infant nutrition. Furthermore, vitamin D reduces the risk of cancer protection, potassium helps reduce the levels of blood pressure and improves heart health, and fermented milk acts as a probiotics source for improving gut health. The high nutritional value of fermented dairy products is motivating the sales of Yogurt Cheesecakes and other dairy based desserts. Other factors responsible for the growth of dairy market include rising consumer spending, growing population and consumer preference for nutritional rich food products. However, the rise in veganism and plant-based eating preferences of vegetarian population is limiting the consumption of dairy products. Lactose intolerance, dairy sensitivity, consumer shift towards plant-based food products, and misconception associated with consumption of milk are other key restraints of the market.
